Female Production Sale

Saturday, October 27, 2018 • 1:00 PM (CST)

At the Ranch, Arapahoe, NE

Welcome TO THE SALE!

WARNER BEEF
•GENETICS•

Welcome to the Annual Female Sale...

It is with great excitement that we present this outstanding group of females. I speak on behalf of Scott, Brandon, and our families, when I say we have dug deep. It is another year with plenty of cow sales and dispersals for you to sift through. We truly believe that this offering surpasses all of our previous and will rival most in terms of quality and consistency. From donor cows to proven production cows, bred heifers, and heifer calves we only brought the ones that we would buy. Our realization of the demands of all of our customers has never been more considered. We recognize the fact that there is a cull sale every week at your local salebarn, this is not that offering. We've sent those females already and this offering will not waste your time with justifications, simply but a high quality offering presented in real world conditions.

We believe in this breed of cattle. We have bred them to align with the industry and to exceed the expectations of our customers. The fertility, longevity, structural soundness and disposition of this offering and this breed allows us to confidently recommend them above all others. Most importantly we aren't going anywhere and recognize the value of the people we do business with. We will stand behind every lot in the offering, if you aren't satisfied we want to know about it and will do everything possible to handle every transaction with personal care and stewardship.

Please feel free to contact any of us at any time and we will assist in any way. See you at the sale!

Exciting new sire that topped the 2018 Cedar Top Ranch bull sale. He and his 5 ET brothers were the most sought after bulls of the entire sale for their phenotype and data set. Purchased with Bar T Bar and used heavily in all three programs. Look for exciting things to come on this great young bull.

AI bred to Dedication on 4/21 due February 1,2019

Maybe the most exciting homozygous black, homozygous polled purebred cow to sell this fall. All breeders would recognize the dam of lot 1 in the Matron 802U female. 3048A is a flush sister to the most exciting group of brothers to ever sell at Warner Beef Genetics. Alumni and New Frontier may be the most advertised siblings, but all the brothers have made positive contributions to the respected programs they reside. 3048A has been awesome in production for us, her first son sold to Mulroy Farms topping the 2016 bull sale. Two daughters created excitement in last year's female sale in the open heifer division. Additionally, her litter of sons were identified by all cattlemen as "the kind" in our 2018 bull sale. 3048A has been automatic in lifetime embryo production as well, being flushed 8 times and averaging 16 freezable embryos per flush.

Her mating to DLW Dedication 7120D gives me as much excitement as any mating produced at Warner Beef. A black purebred calf that is sure to set the standard in the purebred population for pedigree quality and functionality.

It is with mixed emotions to let this revenue generating factory go under the gavel this year. We strive to offer the best each year and it is her time so bid early, often and with confidence as this will be the cow that will never cause regret for owning her.

LOTS 2-9 The proof of the great cow in lot 1. Multiple sire groups in both balancer and purebred percentages, but all have added quality with definite donor potential in their future.

Purebred breeders take notice. Homo black, Homo polled female with in my opinion two of the greatest purebred cows in the breed up close in her pedigree (198L and 802U). If you have a desire to change the Gelbvieh breed in one mating this cow needs to be on your trailer.

Genomic enhanced EPDs.
Sells with a Copperfield heifer calf at side. Birth Date: 8/20/2018
BW: 76lbs

Years ago when Kate and I made a trip to Baker Oregon it proved to be one of the most valuable experiences in our career. Great people and exceptional Angus cattle! We identified the dam of 4219B out of a 300 head contemporary group of the early calving Angus cows. The confidence of the program added to the confidence in the mating of this flush. 4219B is a full sister to the Sam 971B sire that topped our sale in 2015 and is a represented AI sire in our program. Her sisters rang the bell in our female sale as bred heifers and this cow has been exceptional. Her first son by a cleanup sire sold very well to Texas before we enrolled her in our ET program. We've got a tremendous set of ET progeny weaned this fall and they will surely be highlights for years to come. 4219B is the cow that knows her roll in life and works hard without looking for justification or handouts. I challenge any to match her completeness and quality to any cow in the breed and she will run with all of them. Her Copperfield heifer calf at side gives you two donors in one package. Flushed 4 times for an average of 6 freezable embryos. Sells open and ready to flush.

SGRI W970 Sells as Lot 11.

A rare flush opportunity on an outstanding red purebred donor cow. Selected out of the Schroeder dispersal with Cedar Top Ranch to be a source of elite red genetics. We identified her late in life and have bounced her around a little too much to get her going sooner, but this is one unbelievable cow. The embryologist asked me who the Red Angus cow I brought him was and where she came from, without hesitation I corrected him by letting him know she was a purebred Gelbvieh cow. Truly a special female that we will share only once! Flushed 1 time for 5 freezable embryos. Open and ready to flush immediately to the bull of your choice. Guarantee 5 embryos and 2 pregnancies, any eggs over 8 will be available at a prorated price. Breeders you can prove your young herdsire out on this special female.

Treasure Chest Embryo Offering

DLW MS X514 3519A

CCRO MS PRICELESS 1316Y

DLW MS U271 3048A

DLW MS SAM 4219B

Offering choice of three embryos by any of the following matings.

This is the first time we have ever opened up our embryo tank to the public. Several matings by several cows that we believe to be the future of the program and the breed. I think you will find something exciting for everyone. This is not a house cleaning of old embryos but rather a chance to acquire a futurity bull or donor female in a hurry. We've done the homework for you so take advantage!

Wow! The 5160R cow sold in our first female sale to Black Gold Gelbvieh and Loveless Gelbvieh for $40000. We were so disappointed to let her go that we purchased a flush back in the national sale for $10000. It only seemed right to mate the mother of CTR Good Night 715T to our exciting balancer son of 802U, being DLW Sand Trap 928C. It worked like we thought in resulting into 3 outstanding donor prospects. We decided to share 1 and keep the other two. This female has more pedigree excitement than I can imagine. Show quality but her value is in the genetics that is offered, a real live donor female walking in front of you at weaning age. Put her into production and collect checks!

Bull bred to Charlo C520. due March
Super bred heifer out of the Go Daddy Angus bull. These females are the right size and all are good uddered, and productive.

Commercial Bred Heifers

Here is a super set of commercial Balancer bred heifers right out of the Warner Beef Genetics commercial cowherd. Every female was bred and raised here. They are sired by the same bulls as the registered females but out of Angus and Balancer cows. We've developed these females with the commercial customer in mind. Bid with confidence as there is not a more reputable set of hybrid bred heifers to sell this fall. Will sell in groups of 3-5 head.
