HEREFORD
INFLUENCE
.COM

**List your
"white face"
calves with
our Hereford
Influence
program.**

We are excited to offer you an avenue to market your "white face" commercial cattle that are Hoffman bred.

Whether you are selling them at the sale barn, by video or by private treaty, we will list them free of charge to help you gain as much exposure as possible. We value Hereford influenced cattle and are striving to provide other cattlemen from coast-to-coast access to quality genetics. Call today and list your "white face" calves with us.

HerefordInfluence.com will become a household name and a trusted resource.

Buy with confidence and know that we believe in our genetics enough to provide you an outlet to market them.

modern, stout, functional

Annual Bull Sale

February 16, 2018 | 12:00 PM CST

Thedford, Nebraska

Fellow Cattlemen,

It is with great excitement that we offer you our largest offering to-date. We were able to increase our volume while improving the quality of our offering.

We stay relentless on sorting both individuals and genetics for structural soundness and efficiency. Not once have we single-trait selected; we try to keep a true balance of phenotype, structure and EPD values together.

This year we invited the XA Cattle (Bill and Marie Farr) from Moorefield, Nebraska to bring 30 coming two-year old bulls. They are great people, hard workers, and have been big supporters of our program. Their bulls will sell with the same guarantee that we always offer.

In terms of quality, we invite you to see for yourself as we let the bulls do the talking.

Thursday, February 15th, we will have a special customer commercial heifer sale at Valentine Livestock, Valentine, NE. If we can be of any assistance, please do not hesitate to call.

My best,

Jason Hoffman

All sale cattle are available for viewing at any time.

Can't Attend?

Bid Online At:

LiveAuctions 

Bid Live On:

Register prior to sale day.

How to place a bid:

View sale on DISH Network Channel 232
and place your bid over the phone.

Register prior to sale day at

SuperiorLivestock.com or by calling (800) 431-4452.

Terms & Conditions:

- 1) If any bulls are carriers of genetic defects it will be noted in the footnotes.
- 2) Each bull will be sold to the highest bidder without reservation.
- 3) The auctioneer will settle any disputes as to bidding and his decision will be final.
- 4) Terms of all sales will be cash unless arrangements are made between purchaser and seller prior to sale.
- 5) Individual health papers will be furnished with each animal permitting shipment to any state.
- 6) In case an adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit on the purchase of another animal.
- 7) The animal becomes the property of the purchaser as soon as sold, but it shall be the responsibility of the seller to see that animals are properly cared for until delivered to the purchaser.
- 8) Any death or injury after the animal is sold is at the buyer's risk.
- 9) Anyone attending this sale attends at their own risk and without liability on the part of the owners or their employees.
- 10) Corrections or additions of any information contained in the sale catalog will be announced from the auction stand and will take precedence over any printed material.

Sale Catalog & Marketing:

Tonya Orr-Pérez, AgTown.com (970) 353-6227

Providing you The best!

We Go the Extra Mile.

Free delivery to any state in the Continental U.S. is something we proudly offer. Occasionally a buyer may need to meet a trailer at a central spot, but we will do our best to get them directly to you.

We Appreciate Your Business.

We value our volume buyers and gladly offer discounts on multiple bulls purchased. Call Hoffman's for details.

We Guarantee Your Satisfaction on all Phone Bids or Orders.

Bids can be called in to Jason (530-604-5096), Denny Hoffman (406-425-0859) or the Office (308-645-2279) before the sale. We guarantee satisfaction on all bids or orders.

We Believe in Our Program.

Bulls are guaranteed 100% to be sound and healthy breeders, with a first breeding season guarantee unconditional.

We Assist You in the Marketing of Your Calves.

We want to assist you with marketing your calves! Every year Hoffman's place large groups of replacement heifers throughout the U.S. We also stay in direct contact with feed yards that are interested and familiar with our genetics. Furthermore, we started **HerefordInfluence.com** to advertise your cattle and list where and when they are selling. This marketing avenue is free of charge and we plan on making it a fast "go to" place for perspective buyers across the country! Call the Hoffman Ranch (308-645-2279) to list your cattle.

We Do It All For You, Our Valued Buyer!

Hoffman bred bulls perform at all levels.

2014 National Western Stock Show Champion Carload

Preparing and showing a carload of bulls at the National Western Stock Show is no small feat.

It is a huge commitment physically and financially, but it has been a constant goal of our operation to raise bulls that can compete on a national level — 10 at a time. Out of all the banners and trophies we have won, these four carload champions make every ounce of work worth it.

Carload Bulls Sell as Lots 1, 3, 8, 15, 17, 44, 45, 48, 50, 51, 54, 78, and 81

A straight horned herd sire that topped our 2014 bull sale for \$60,000 to Del-
 hawk, Burns, Southern Cattle Co & Reed Polled Herefords. These cattle are thick,
 sound, great uddered, and possess every quality expected. Out of 955 and the
 5139 cow family.

Top Shelf has made an excellent heifer bull, but he cannot be limited for just heifers. He is a true breeding bull that adds length, volume, natural thickness, and quality. He is not only a tremendous herd bull maker, but we are a big fan of his daughters as well.

- One of the true highlights of the sale
 - This is a heifer bull with so much more
 - He's very complete and thick, massive ribbed and stout structure
 - Out of a young Earnan daughter that is a true power cow

Cowboy Up is a massive made bull that is very sound structured. He has been heavily used throughout the breed. I think his sons will be a cowboy's-type bull. They are massive made and soggy.

Valor has added true performance. His sons have a lot of length, depth and mass. They are very sound structured cattle and are good on their feet and legs as well. Valor also transmits very strong carcass traits.

A moderate framed, sound structured, easy fleshing bull. His sons have been easy to sell. We like the pattern and the fleshing ability of these cattle. His first daughters in production are among the elite.

The Aviator cattle are slam dunk low birth weight. Aviator has been a favorite by both purebred and commercial cattlemen who have seen him in stud at ORigen.

Musgrave Big Sky has worked extremely well here in our program. They are bigger framed, faster growing cattle that are very fertile and are still sound on their feet and legs. In our 2016 bull sale, 20 sons averaged \$10,000 each.

Outside Canadian genetics. These cattle are known for both power and pattern.

Guide to Hereford EPDs

Calving Ease – Direct (CE) :

CE EPDs are based on calving ease scores and birth weights. More positive EPDs are favorable and indicate easier calving. The EPD for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

Birth Weight (BW) :

The BW EPD is an indicator of birth weight and calving ease. Progeny sired by a bull with a BW EPD of 2.2 can be expected to weigh 3.2 lb. more at birth, on average, than progeny sired by a bull with an EPD of -1.0 lb. (2.2 minus -1.0 = 3.2 lb.) Birth weight is another indicator of calving ease. Larger BW EPDs usually, but not always, indicate more calving difficulty.

Weaning Weight (WW) :

The WW EPD reflects pre-weaning growth potential. Measured from adjusted 205-day weight. It is an indicator of direct genes for growth independent of milk production of the dam. Calves sired by a bull with a WW EPD of 30 should have a 20 lb. advantage in 205-day adjusted weaning weight compared to calves sired by a bull with an EPD of +10 lb. (30 minus 10.0 = 20 lb.).

Yearling Weight (YW) :

YW EPD for a sire with an EPD of 87 indicates that on average, his progeny should be 30 lb. above the average of progeny of a bull with an EPD of 57 lb. YW EPD reflects differences in the 365-day adjusted yearling weight for progeny. It is the best estimate of total growth.

Maternal Milk (MILK) :

The MM EPD is a prediction of weaning weight differences due to milk and maternal ability of the dam. For a sire, the MM EPD predicts the maternal ability of his daughters expressed in pounds of calf weaned. MM EPD's do not specifically predict pounds of milk produced, but pounds of calf weaned due to maternal production of the dam. It predicts the difference in average weaning weight of sires' daughters' progeny due to milking ability. Daughters of a sire with a MM EPD of 14 should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production over the entire lactation period.

Maternal Milk & Growth (M&G) :

The MG EPD is a combination EPD. It is the MM EPD plus 1/2 the WW EPD. It has no accuracy value since it is simply a combination of two other EPD's. A sire's MG EPD reflects what he is expected to transmit to his daughters for a combination of both growth genetics (WW EPD) and maternal production (MM EPD). This EPD is sometimes referred to as "total maternal" or "combined maternal."

Scrotal Circumference (SC) :

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with an EPD of 0.7 should have yearling scrotal circumference measurements that average 0.7 cm. larger than progeny by a bull with an EPD of 0.0. In this genetic analysis, a multiple-trait model was used for scrotal circumference. Weaning weight was used as a predictor variable to increase the prediction accuracy of SC EPDs. Therefore, an animal with a weaning weight EPD should also have an SC EPD.

Ribeye Area (REA):

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (MARB):

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF] based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

BMI Index (BMI) :

The Baldy Maternal Index is a maternally focused index that has a production system based off of 1000 Hereford x Angus females with a progeny harvest endpoint directed towards CHB. This index is more critical of CE than the Brahman Influence Index and also has significant weight on fertility. There is positive weight on WW and a slightly negative weight on YW which promotes early growth and then a slow down on growth to keep mature size manageable. The weight for IMF is greater than the weight for REA. This is true because of the price difference between the choice-select spread and the fact that there is very little incentive to produce cattle better than a yield grade 3. The question comes up concerning the fact that our branded beef program (CHB) has been successful because of the acceptance of Select cattle. In answer to this, we are using a crossbreeding production system that could sell cattle on several grids and that our CHB program is installing a choice product. This index is geared to service any commercial program that runs British cross cows.

CHB Index (CHB) :

The CHB Index is a terminal sire index that is built on a production system where Hereford bulls sire calves for the CHB market. There is some pressure put on CE and then positive weight on both WW and YW. Remember that all offspring in this index are harvested, so we want them to be born alive and then grow fast at all stages of life. Of course, we have a much heavier weight value on fat in this index, as we want the cattle to stay lean. There is also a significant weight on both REA and IMF with more emphasis again on IMF. This index would be used by producers who have a target of producing bulls for a terminal breeding program. This index could be used heavily in the Midwest where bulls are used in rotational breeding programs to produce cattle in a retained ownership program or simply sold to backgrounders. This is the only index that has no emphasis on fertility. Remember that nothing is retained in the herd.

ALL PERCENTILES GIVEN
BY HOFFMAN RANCH ARE
RELATIVE TO THE 2016-2017
BORN CALVES FOR THE ENTIRE
HEREFORD BREED.

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPRTM and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Increase
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	.11	3
Fat	.08	2
Rib-Eye Area	.07	2
Marbling	.10	3

* *Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.*

Guide to Angus EPDs

Calving Ease Direct (CED),

is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW),

expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW),

expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW),

expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk),

is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Calving Ease Maternal (CEM),

is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Scrotal Circumference EPD (SC),

expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Marbling EPD (Marb),

expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE),

expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat),

expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

Beef Value (\$B),

an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires. Remember that nothing is retained in the herd.

Each animal tested is
recognized with the
AAA 50K EPD logo.

GE-EPDs powered by HD 50K for Angus — Impact on EPDs, accuracy values, associated progeny equivalents and interpretation of percent ranks.

Trait	PE	Trait	PE
Calving Ease Direct	28	Heifer Pregnancy	14
Birth Weight	21	Milk	33
Weaning Weight	26	Mature Weight	11
Yearling Weight	21	Mature Height	8
Dry Matter Intake	8	Carcass Weight	9
Yearling Height	11	Carcass Marbling	9
Scrotal Circumference	13	Carcass Ribeye	12
Dockility	10	Carcass Fat	10

Calving Ease (CE):

Percent of unassisted births when used on heifers.

Birth Weight (BW):

Pounds of birth weight.

Weaning Weight (WW):

Pounds of weaning weight.

Yearling Weight (YW):

Pounds of yearling weight.

Milk (MLK):

Pounds of weaning weight due to milk.

Carcass Weight (CW):

Pounds of carcass weight.

Yield Grade (YG):

Yield grade score.

Marbling (MRB):

Marbling score.

Back Fat (BF):

Inches of backfat.

Ribeye Area (REA):

Square inches of ribeye.

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI):

Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

STAND OUT WITH PROVEN GENETICS

THE **HEREFORD ADVANTAGE** PROGRAM

*Increase added market power and brand recognition
with feeder cattle sired by a Hereford bull battery
ranking in the top 50% for \$CHB.*

HOW TO GET STARTED:

Visit HEREFORDFEEDERCATTLE.COM to
download the form.

Complete and submit form to
American Hereford Association.

Information form with EPD
rankings will be returned to the
producer.

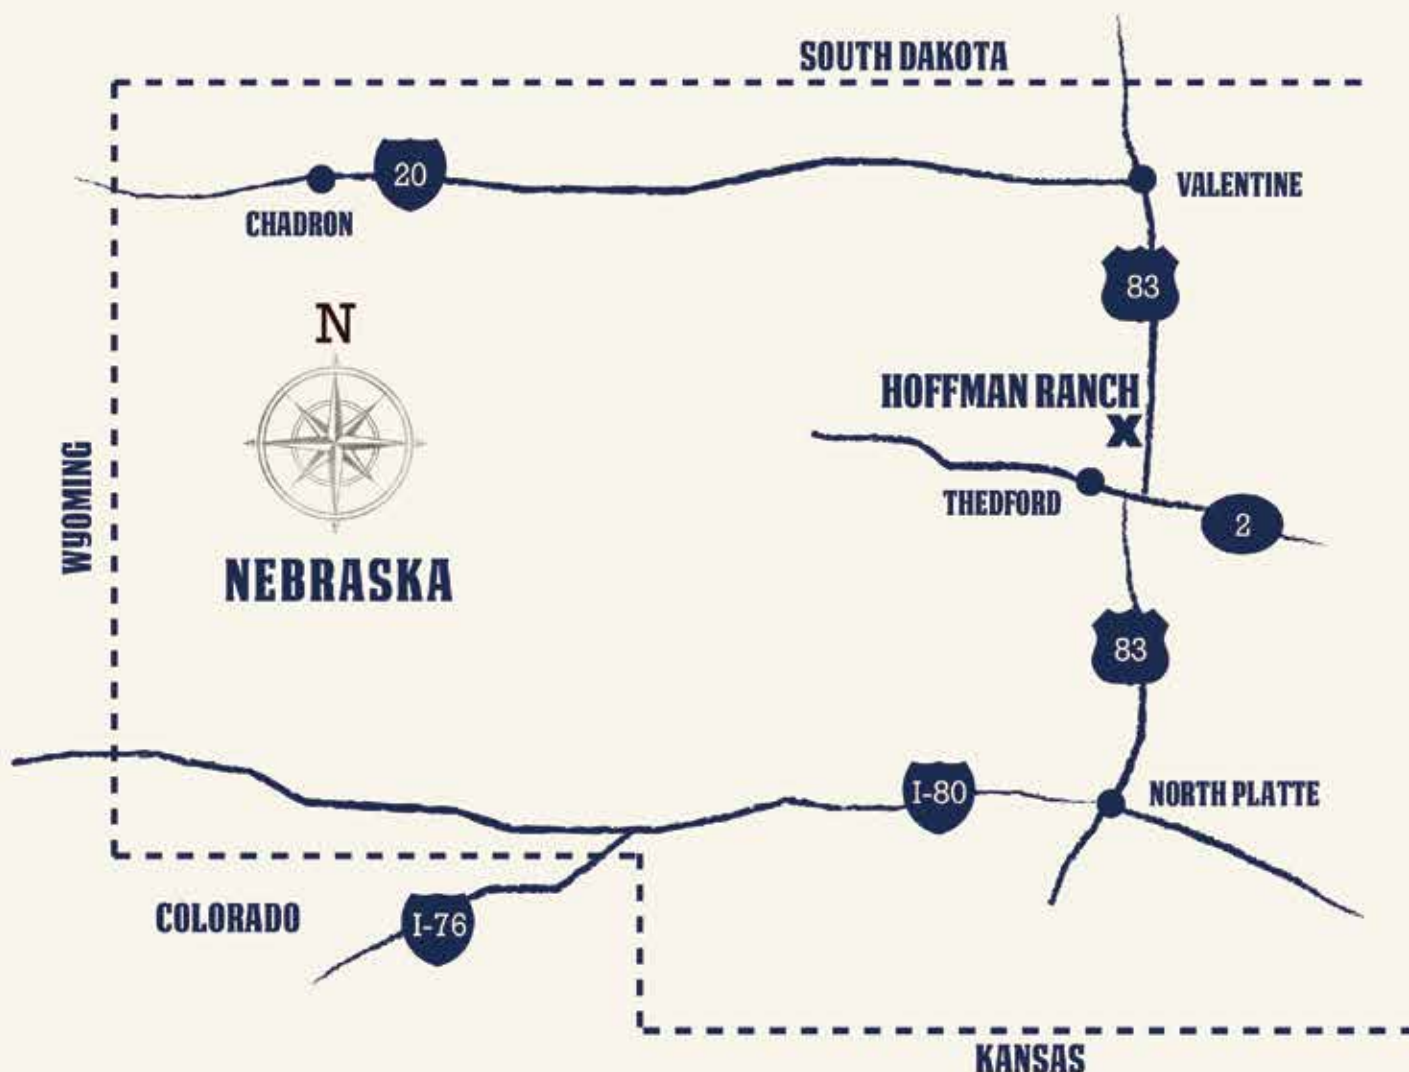

“The Hereford Advantage program helps us to focus on providing the best quality genetics that we can possibly provide to our customers, the cattle feeder. We try to select bulls who will sire calves that will excel in the feed yard.”

-NANCY BOWLING
Bowling Ranch, Newkirk, Okla.

Certified Hereford Beef Index (\$CHB) is a terminal sire index that is built on a production system where Hereford bulls are used on Angus-based cows with a focus on feedlot performance and end-product merit. To qualify for the Hereford Advantage program, cattle must be sired by registered Hereford bulls with transferred ownership, and the Hereford bull battery must have a \$CHB value ranking in the top 50%.

Thank you

for supporting our program

Hoffman Ranch

39327 W. Antelope Valley Rd.
Thedford, Nebraska 69166

The Hoffman Ranch sale facility is located 5.5 miles north of Thedford on HWY 83 towards Valentine, Nebraska. The entrance is on the west side of the highway.

Drive Times:

North Platte, NE – 1 Hour
Lincoln, NE – 5.5 Hours
Denver, CO – 5 Hours
Rapid City, SD – 4.5 Hours

Lodging:

Roadside Inn: Thedford, NE (308) 645-2284
Frontier Inn: Halsey, NE (308) 533-2240
Niobrara Lodge: Valentine, NE (877) 376-3003
Comfort Inn: Valentine, NE (402) 376-3300
Motel Rain: Valentine, NE (402) 376-2030
Holiday Inn Express: North Platte, NE (877) 863-4780

Airport Transportation:

There is an airport available in Thedford with a 4,400-foot landing strip. The closest commercial airport is located in North Platte.
