Fellow Cattlemen~

Welcome to our 6th annual production sale! We want to thank you for coming and showing support in our program. 2019 has proven to be, yet again, a year full of adversity and challenge in the agricultural industry. With market volatility and weather events for the record books, this lifestyle is not for the faint of heart. We want to personally welcome you to one of the very few things in this industry that's steady and consistent; our commitment to good cattle and one of a kind customer service.

The set of bulls in the offering had a great summer on grass and came off in their working clothes. We have never been happier with the condition of the bulls coming into the feedlot. They couldn't have utilized their time on grass any better, and we are confident you will notice this too. We have paid extra attention to feet and leg structure with this offering and are confident they are some of the most correct, as a whole, there is around.

Our industry is constantly changing and if you don't progress forward, you will get left in the dust. We are constantly looking at ways to progress forward with our operation to offer you the freshest genetics for your cow herd. We have reintroduced an extensive embryo transfer program to our lineup. We have spent countless hours combing our cow herd selecting the absolute best we have as donor cows. We have been fortunate enough to flush to top rated sires in the industry and we can't wait to see the calves hit the ground in the spring. This is going to be an incredible set of bulls and we can't wait to offer them to you at our 2021 sale. Please feel free to come out next summer and get the first look at these exciting progeny.

As always, we want to remind you that customer service is our top priority. If you ever have a problem with your bull, please don't hesitate to call. We thrive on the opportunity to make it right with you. Our doors are always open for a visit and a cup of coffee. Again, thank you for coming and see you on down the trail.

Richard Angus Ranch

**Brandon, Emily, Eversynn, Emmett & Finley Richard
Byron and Kathy Richard**

**All bulls selling have a
complete genetic profile.**

Selling

117 Coming Two Year Old Bulls
230 Commercial Bred Heifers

ALL VIRGINS • NON CREP FED

Friday, December 13, 2019

CAB lunch at noon, sale at 1:30 MDT at the ranch in Belfield, ND

Auctioneer Service

The auction will be conducted by Seth Weishaar,
605-210-1124.

Phone Bidding

Advance phone bids must be arranged 24 hours before
auction. Sale day phone numbers include,
Brandon 701-290-6544, Emily 701-872-6658, or
Byron 701-290-1581.

Press Representatives

Kirby Goettsch, Farm & Ranch Guide . . . 605.380.3939
Jared Murnin, Western Ag Reporter. 406.321.1542
Will Bollum, Western Ag Reporter. 507.244.0833
Rod Geppert, American Angus Assoc. . . . 605.295.3673

Delivery

Free delivery up to 500 miles beginning March 1st. In the
event you are unable to take your bulls around March
1st, we can make arrangements to feed them until May
1st at a cost of \$2.50 per day.

Terms and Conditions

This sale is being conducted under the recommended
sale terms and conditions adopted by the American
Angus Association. These can be accessed at
www.angus.org. Announcements from the block take
precedence over information in this catalog.

**THERE WILL BE A SALE ORDER USED ON SALE
DAY. IT WILL BE AVAILABLE ON OUR WEBSITE
PRIOR TO SALE DAY.**

Health

All cattle selling are cleared for interstate shipment. All
bulls have been fertility tested by Dr. AJ Domek, Blue
Mountain Veterinary Services.

Genetic Defect Status

Our herd has been blood tested for the most recent
genetic defects. Our herd has been culled accordingly
based on these genetic results.

Lunch

Please join us for a Certified Angus Beef lunch at the
barn, starting around noon sale day!

Insurance

We will be offering insurance for your bull purchases
from Dakota Ag Insurance, agent Jared Mohnen,
605-682-1368. He will be available sale day for your
convenience to answer any questions and purchase
insurance if you wish.

Guarantee

All bulls are fully guaranteed for the first 90 day breeding
season. You will receive full credit minus salvage value on
all bulls. If you have any problem with your bull, please
contact us immediately and will get it taken care of for
you. ALL WARRANTY CLAIMS AFTER OCTOBER 1ST
WILL BE VOID.

Discount

Richard Angus Ranch offers a volume discount of 5% for
5 bulls or more. We are also offering a repeat customer
discount of 1% for every year above 3 years you buy
our bulls, capping out at 5%. (example: You have been
buying our bulls for 3 consecutive years you will receive
a 3% discount, 4% for 4 years and so on up to 5%.)

Liability

Richard Angus Ranch will not be held responsible for
any accidents.

Retained Interest

Richard Angus Ranch will retain 1/3 semen rights on all
bulls sold.

Accommodations

There are several hotels in the surrounding areas of
Medora, Dickinson, and Belfield. We would be happy to
make reservations for you!

References

American Angus Association®, AHIR®, Angus
Source®, CAB®, Pathfinder®. EPDs current as of
October 3, 2019. Updated EPDs can be viewed at
www.angus.org.

All the bulls for sale have passed an extensive breeding soundness exam including sound feet and legs, visual acuity, and satisfactory semen and reproductive anatomy. Further details about the scoring can be found on the individual BSE sheets.

All bulls have an extensive herd health regimen consisting of multiple Vision 7 Somnus vaccinations and Vista Once 5-way respiratory vaccinations. They have had an initial vaccination followed by a booster of Vista 3 VL5 SQ helping to effectively eliminate any viral causes of subfertility. Safeguard oral drench has also been administered.

Bred heifers are on Vista 3 VL5 SQ regimen and have received Safeguard anthelmintic. They have been confirmed pregnant via ultrasound in late August and again prior to sale day.

Feel free to contact me with any questions regarding herd health or BSE scores.

Welcome to the Richard Ranch Annual Production Sale.

Progress comes in many forms, at Richard Ranch it comes with bulls in quality and quantity.

Raising the size of their purebred herd a couple of years back accomplished both, an increase in numbers and class. Richard Ranch has become one of the larger breeders of Angus seed stock that supply two year old bulls to the region. Brandon and Emily both agree a two year old bull is right for their customer base. It's a great feeling to know you're buying from people who get it right!

The solid foundation of mother cows allows this operation to be in attack mode at breeding time. They can pursue the exact genetics they want because the cow herd is in such excellent shape from a genetic standpoint. Every year some of the best sires that are purchased around a five state area reside in Belfield. Selection of A.I. sires is well thought out process, many times these excellent A.I. sires they use are also used to clean up with. This creates large sire groups that allow astute commercial cattle producers to purchase half or three quarter brothers.

As always the commercial bred heifers will be a sale feature. If you're looking for outstanding commercial females they are here each and every year, and are always bred to an outstanding set of bulls. These A.I. sires are top notch.

I hope you can be with us for this years sale. If I can be of any assistance as you prepare for this sale please don't hesitate to call.

Ron Frye

Bull Development Program

The bulls have been developed with no creep feed, on native range and mother's milk. Weaning begins around the middle of October. 25-30% of the bulls will be culled for structure and performance ability. At this time, the bulls head to our home feed yard where they are placed on a high roughage diet consisting of chopped hay, silage, modified distillers grain, and whole corn. The bulls are not pushed for the highest average daily gain, but are developed more slowly with a target gain of 2.75 pounds per day.

By mid-April, the bulls will be brought in for carcass ultrasounding and yearling weights. At this time another 10% will be culled. By May 1st, all bulls will be turned out on grass with a complete salt and mineral package as well as protein tubs pending the quality of the grass.

October 1st the bulls are headed home to the feed yard again and are put back on their high forage ration consisting of chopped hay, silage, modified distillers, and whole corn. The same principles are applied in reference to average daily gain and moderate development to maintain optimum foot and leg structure.

Fertility and structural soundness are our highest priority from birth to sale day. We achieve this by strictly culling at multiple stages of life. We feel this ensures we are selling the best possible product to you on sale day!

*All bulls selling have a
complete genetic profile.*

ANGUS^{GS}
Powered by Neogen GeneSeek

ANGUS. ONLY ANGUS.

There's only one DNA profile created specifically for Angus cattle.

Angus GS™ is the new standard in genetic testing for Angus cattle. Created by Angus Genetics, the profile is purely Angus DNA, so it will have better predictability and deliver more power and accuracy than any previous generation genomic enhanced EPD, and at a much greater value. Visit angus.org/agi for the test that only Angus Genetics could create.

FOR ANGUS. BY ANGUS.

CW	Marb	RE	Fat	\$W	\$F	\$B	
+78	+.29	+.63	+.020	+86	+126	+162	
Act. BW	205 wt	WN Ratio	365 wt	YW Ratio	Act. SC		
89	851	130	1326	122	43.0		

Calving Ease Direct (CED) - Expressed as the difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which an sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW) - Expressed in pounds, is a predictor of an individual's ability to transmit birth weight to his progeny compared to that of other individuals.

Weaning Weight EPD (WW) - Expressed in pounds, is a predictor of an individual's ability to transmit weaning growth to his progeny compared to that of other individuals.

Yearling Weight EPD (YW) - Expressed in pounds, is a predictor of an individual's ability to transmit yearling growth to his progeny compared to that of other individuals.

Maternal Milk EPD (Milk) - A predictor of individual's genetic merit for milk and mothering ability compared to other individuals. It is that part of a calf's weaning weight attributed to milk and mothering ability.

Docility - is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Scrotal - expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Cow Energy Value (\$EN) - expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Act. BW - Actual Birth weight

205 Wt. - Weaning weight adjusted to 205 day weight to allow comparison among individuals.

WN Ratio - A direct comparison of one calf to all others in his contemporary group.

365 Wt. - Yearling weight adjusted to 365 day weight to allow comparison among individuals.

YW Ratio - A direct comparison of one calf to all others in his contemporary group.

Act. SC - Actual scrotal circumference.

Carcass Weight EPD (CW) - expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb) - Expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE) - Expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat) - Expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

Weaned Calf Value (\$W) - An index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F) - an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics for postweaning feedlot merit compared to the progeny of other sires. The underlying objective assumes producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis, but with no consideration of premiums or discounts for quality and yield grade. Traits contributing directly to the index are as follows: yearling weight (gain), carcass weight and feed efficiency.

Beef Value (\$B) - an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Legendary has proven to be the most exciting bull raised at Richard Angus Ranch. He has been a stand out since birth and has not missed a step throughout his development. He bodes a near perfect look with a huge EPD profile to back it up. He has taken all of Cowboy Up's best traits and gone a step further mixing Wisdom in to fill the holes. He is in the top 10% for foot and claw EPDs, and really touches on all the right numbers. We reintroduced him back into our herd this past breeding season and are very excited to see his progeny. His powerful dam has been chosen as a donor for our ET program. She is a deep, broody cow with a huge hip and correct structure.

Reference Sire

Logic came from the KG Ranch, as many of our cattle did, from their 2016 sale. He was a sale topper then and continued with his fancy look until we lost him last summer. Both his bulls and heifers are moving to the front of the pack for looks and docility.

PAYBACK MONTHLY SPECIAL
Payback Minerals
 available with Zimpro® Performance Minerals and Bio-Max®

\$40 OFF PER TON

Ranchers, make **PAYBACK MINERAL** part of your productive feeding program, for a healthy, profitable herd.

Payback Mineral

Features:

- Improved growth
- Improved condition
- Better conception rates

Cows:

- Tighter calving intervals
- Improved conception rates

Bulls:

- Earlier puberty
- Enhanced semen quality
- Improved test results

Health benefits:

- Improved maximum weight
- Better nutrition response
- Lower incidence of stress

Residual effects:

- Increased milk production
- Tighter calving intervals
- Greater weaning weights

Get all the Payback mineral recommendations for your operation from the great experts at Payback Minerals.

©2010 Payback Minerals, Inc. 100

Consistent was purchased from Ellingson Angus in St. Anthony, ND and is owned with Arntzen Angus. He is really starting to come forward in the business and can be seen in sales around the region. He is a female maker with broody daughters that will make beautiful cows.

Reference Sire

"UNA" as he is known around here came to us from Diamond J Angus in Mandan, ND. He is a thick, deep bull that has cleaned up our herd for 5 years now. He is fleshy any time of year and does a nice job passing his fancy look onto his progeny. We have kept numerous daughters and they are proving to be fancy cows.

Everlast was purchased in the spring of 2017 from Mohnen Angus in South Dakota. He is about as deep of a bull as we have seen. He has a clean sheath, broad front, and huge hip. He is a flashy bull to look at and his calves are proving to be the same. We will have many more progeny of Everlast in next years offering.

BRED HEIFERS

We are excited to have another great set of fancy, commercial bred heifers in the offering this year. These heifers are the result of our Heifer Buyback Program and have been sorted for quality, docility, and fertility. They are deep bodied, broody females that will make superior mama cows. They are weighing between 1100-1150 pounds on sale day.

- 1. High Bidder will have the option of a 10 head minimum up to the entire pen.*
- 2. Heifers must be hauled out at the buyer's expense within 5 days of the sale. We would be happy to help with trucking arrangements.*
- 3. All heifers have received Vista 3 VL5 SQ breeding shots, Safeguard Oral suspension, and Clean Up II*
- 4. All heifers are ultrasounded safe with calf prior to sale day by Dr. AJ Domek, Blue Mountain Veterinary Services. AI Bred females are identified with a notch in their ear tag*

150 black heifers are comprised solely from our home raised set. These heifers will be a combination of AI bred and bull bred. The AI bred heifers are bred to SITZ Profile 11606 and are due to calve March 20th and the bull bred heifers are bred with Richard Angus Ranch heifer bulls and are due to calve April 1st – May 1st. There will be 101 AI breds and 49 bull bred

80 F1 Baldy heifers from the prominent herd of Mike Perault of Belvidere, South Dakota. These heifers have been culled deeply for structural soundness, docility, and fleshing ability. These heifers will also be a combination of AI bred and bull breds, bred also to SITZ Profile and Richard Angus Ranch heifer bulls. There will be 58 AI bred and 28 bull breds.

Heifers will be penned on sale day according to how they are bred.

*Thanks for your
continued support*

Thank You

Richard Angus Ranch would like to thank our great crew, Jacob Hartfeld and his family, Sean Johnson, Clay Makelky, and Denver Tessier, for all their hard work throughout the year. They are a key part of our operation and we greatly appreciate them.

L-R: Jacob Hartfeld, Sean "Rip" Johnson, Clay Makelky, Denver Tessier

"Rip drivin' the herd"

We would also like to thank our day working crew that helps in the busiest times of the year, Sandy and Lindsey Koch, Bridger Boltz, Bailey Boltz, Owen Makelky, and Shea Shypkoski

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

American Angus Association \$Value Indexes

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

Cow Energy Value (\$EN), an index expressed in dollars per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in future daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing \$EN savings differences include lactation energy requirements and energy costs associated with differences in mature cow size.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.
