48th

Bull Sale

March 7, 2026

12:00 Noon

Judd Ranch, Inc.

Pomona, Kansas

FREE TRUCKING — When your purchases total \$30,000 or more, JRI will truck your bulls FREE within the continental United States and JRI delivers directly to your door, not to some central location miles away from you. \$30,000 or more going out of the 48 states will be trucked free of charge to the border. On purchases of less than \$30,000 trucking is usually very affordable because Judd Ranch bulls annually sell into 20 plus states.

QUALITY ACCEPTANCE GUARANTEE — JRI wants you to check out the bulls and see them for yourself. Thus, you will be reimbursed for your travel expenses if you arrive at the sale and don't find the sale bulls as described to you by our phone conversation. This is the only such money-back guarantee in the industry!

CUSTOMER APPRECIATION HAMBURGER FRY March 6 — To express our appreciation for your interest in our bull sale, we'd like you to join us for a complimentary pre-sale hamburger fry at the Ranch. We invite you to come early on Friday afternoon to view the bulls, then join us for a grab-and-go meal. Tables will be setup to enjoy the meal and hamburgers will start coming off the grill around 5 p.m. and will continue to be served until 7:30 p.m.

SALE DAY LUNCH — Be our guests at the Judd Ranch. Complimentary lunch will be served at 11:00.

TRAVEL — Judd Ranch is located 1 1/2 to 2 hours from Kansas City MCI Airport. Private landing at Ottawa Municipal Airport located three miles south of Ottawa and 15 minutes from Judd Ranch, Ottawa Municipal Airport phone (785) 242-5310.

RANCH LOCATION — 2 miles west of Pomona, Ks. on Hwy. K-68, or 12 miles west of Ottawa, KS on Hwy. K-68.

ACCOMMODATIONS — Please call by February 25 and ask for reserved Judd Ranch Bull Sale rooms. All motels are located at the south end of Ottawa. From interstate 35 take Exit 183B north to the first stop light. turn left. **From Judd Ranch:** Go east to Ottawa on K-68 highway. At the west edge of Ottawa K-68 goes north...at that point turn south (right) on Eisenhower Rd. 2 miles to 23rd St. Go east (left) on 23rd St. one mile and turn right on the road behind Taco Bell and continue up the road.

Flash - NEW Sale Motel Headquarters
Holiday Inn Express & Suites
(785) 521-7009 Option - 0
2140 S. King Street Ottawa, KS

The Holiday Inn has an indoor heated pool and fitness room. They have a complimentary hot breakfast that includes biscuits and gravy, bacon, sausage, scrambled eggs, omelets, cinnamon rolls, pancakes, cereal and milk, muffins, yogurt and milk. Alternative Accommodations

Best Western - Ottawa (785) 242-2224
Econolodge - Ottawa (785) 242-3400
Super 8 - Ottawa (785) 242-5551
Comfort Inn - Ottawa (785)242-9898

INSURANCE — Buyers, to protect your buying interest, shipping insurance is offered at settlement time. On our Free Delivery on purchases of \$30,000 or more we encourage you to purchase insurance. Our haulers have insurance but this insurance only covers the commercial value of your animals. Shipping insurance only covers death of the animal but given the minimal cost of such insurance we'd encourage all buyers to purchase it.

SIGHT UNSEEN PURCHASES — If you can't attend the sale and you want to buy, call: Judd Ranch Sale Consultant Roger Gatz (800) 743-0026 about our "Guaranteed to Please" Purchasing Agreement. Annually 25% of our gross sales are purchased through this time and money saving program. All bulls are guaranteed to meet your approval or you don't own them.

DNA Testing-Any animal DNA tested for homozygous black that are known red carriers will be designated with (RC). Any animal DNA tested for homozygous polled that are known to be heterozygous polled will be designated with (HP) at the end of the animal footnotes. Judd Ranch is retaining a 1/2 semen interest on all bulls selling. You are buying full possession and have the right to sell your bull at any time. If you decide to collect and sell semen Judd Ranch would receive 1/2 of the semen royalties. If Judd Ranch sells semen on said bull you would receive a 1/2 semen royalty.

On behalf of our
dedicated family;
welcome to the
48th Judd Ranch

Herd Bull Sale. This year we will be selling 327 head and feel the 2026 offering to be the most uniform, extremely sound, highly functional, very fertile set of herd bulls with the most genetic potential ever at Judd Ranch. As in the past, all the top bulls have been saved for sale day, including our 2026 National Champions: Pen of 5 Gelbviehs, Pen of 3 Gelbviehs, Pen of 5 Balancers and Pen of 3 Balancers... **Clean sweep of 2026 National Champion Pen Bulls**

Our family works every day to produce and provide our highly valued customers with powerful genetics that have built-in basic fundamentals which defy the odds-on antagonistic traits of which are geared for crossbreeding programs and act as a catalyst to produce progeny that are optimal and highly profitable for all sectors of the industry.

We are proud of the genetic uniformity and balance of traits the Judd Ranch herd has achieved by stacking generations of like phenotypes and genotypes. We feel bulls that have stacked like pedigrees are the key to a predictable balanced gene pool that possess the prepotency to sire predictable uniformity in multiple traits. Therefore, we are confident the Judd Ranch bulls of today are a complete package of superior genetics that should breed true. Every bull has passed a breeding soundness exam and is guaranteed to breed cows and, as always, we stand behind each and every bull.

Facts and Statistics of 2026 Sale Offering

BSE Every bull in the sale has passed a breeding soundness exam (BSE) performed by Dr. Mages in February. However, we recommend a BSE just prior to turning out with cows. Especially if you are relying on a single bull per group of cows.

IMF SCORES 3.7 IMF Average for the Spring Bulls with 0.30 back fat and 2.7 IMF Average for the Fall Bulls with 0.21 back fat.

Frame Size Average 365 day adjusted frame score for Fall Sale Bulls, 5.7 and 5.8 for all Spring Bulls. There should be bulls within most people's parameters for frame size.

Birth Weight and Calving ease Status 82 lbs. average on Fall Bulls, 83 lbs. average on Spring Bulls, gestation length has also shortened a lot over the years, which also helps to reduce birth weight.

205 Day Weight Fall Sale Bulls average 783 pounds 205 adjusted weight and an average actual weaning weight of 912 pounds off the cow. Spring Sale Bulls averaged 742 pounds 205 adjusted weight and average actual weaning weight of 864 pounds off the cow.

Cows Actual % of Body Weight Weaned Fall Gelbvieh Cows with Bull Calves average 56%. Fall First calf Gelbvieh averaged 60%. Spring Gelbvieh Cows with Bull calves average 60%. Spring first calf cows with bull calves average 66%. We do not use any adjustments for the calf's age as we feel the cows that calve earlier in the season should get an advantage for fertility.

365 Day Weight Average for Fall Sale Bulls 1,234 pounds and Spring Sale Bulls 1,296 pounds.

Average Daily Gain on Test 4.70 ADG for all Fall Sale Bulls. 4.70 ADG for all Spring Sale Bulls. The bulls are weighed in right off the cow at weaning (no shrink applied, no warmup) and fed a high roughage ration which includes prairie hay, corn silage, alfalfa haylage and corn.

Adjusted 365 Day Ribeye Area 15.3 square inch average for Spring Sale Bulls and 14.7 square inch average for Fall Sale Bulls. 1.1 square inch of ribeye per 100 pounds of body weight off test, which is right on track.

365 Day Average Scrotal Circumference 36.5 cm Fall Bulls. 37.5 cm Spring Bulls. We feel large scrotals provide added fertility to females and males, along with early puberty on heifers.

Adjusted 365 Day Pelvis 172 cm Average on Fall Sale Bulls. 174 cm Average on Spring Sale Bulls.

Dam of Merit/ Dam of Distinction Status 100% of the Gelbvieh and Balancer sale bulls feature Judd Ranch honored DOM and or DOD cow family genetics.

Structural Soundness Freedom of movement and hoof size and correctness are traits we check closely and breed for. Also we run the Fall Bulls in large pastures after gain test, August – November, with no supplement feed. We feel this helps soundness and teaches the boys to get out and cover the country and learn to hunt for a living.

Polled/Homozygous Polled Status 100% of the sale bulls are polled. There are 317 head of homozygous polled bulls in the offering and 246 head of black polled bulls.

Disposition Status We also watch temperament closely at Judd Ranch and don't believe you will find a more docile set of bulls anywhere. However, there are usually a few bulls in the offering that we feel are not as docile as we prefer and will be announced as average disposition bulls from the auction block.

PI BVD Judd Ranch has tested almost every calf (bulls and heifers) for the past 13 years and have all been negative. And all sale bulls are tested negative for PI BVD.

Brucellosis Judd Ranch is an Accredited Brucellosis Free Herd Certification #271. All cows and herd bulls are tested annually.

Trichomonas Testing We realize there are some states requiring a negative trich test on most bulls entering their state. **We recommend those of you from out of state please check your state's requirements before bringing your trailer as it takes a few days to complete the testing if required.**

One of Gelbvieh's biggest strengths is the cow power of the female. Yes, the Gelbvieh cow can raise scale smashing calves and be pregnant on schedule with another calf. Lee Leachman's data on over 200,000 cow records, of all breeds, puts Gelbvieh influence females number one for pounds of calf weaned per cow exposed every time. Also, Gelbvieh and Balancers cross extremely well with other breeds, as Gelbvieh and Balancer bring fertility, milk, reduced cow size, pounds of calf, good disposition, and optimum birth weight to the equation.

Our family would like to extend a huge thank you to all our friends, neighbors and crew who helped with the sale and throughout the year! Especially Roger and Peg Gatz of Cattlemen's Connection for all their expertise, hard work and dedication to the Judd Ranch program, for nearly 40 years. I would also like to extend a huge thank you to my family for their hard work and dedication to producing high quality seedstock. It takes all of us including Cindy, Nick, Ginger, Brent and Ashley putting in long hours and hard days doing all the extra jobs that it takes to make a seedstock operation run smoothly. Just some of dotting the i's and crossing the t's include weighing and tattooing every calf at birth, artificially inseminating every cow, running our embryo transfer program, preparing pen bulls and sale cattle, extra herd testing for health and fertility, accurate record keeping, feed production and storage, building fence and water systems and equipment and truck repair. Cindy and I are very proud of our family and appreciate all their hard work toward making Judd Ranch a success. It is truly a team effort.

We continue to be grateful for our customers who are both great folks and some of the best cow people from across the country. Many of you have become both our customers and very good friends. We are honored and privileged to be your genetic supplier. It is always a pleasure to work with people who have a true appreciation for the land, the lifestyle and the almighty COW. You folks are to be commended for the tremendous job you do with your outfits and cowherds. You deserve the best and we wish you all the best. We hope you can make plans to come on Friday, view the bulls and then join us for our annual customer appreciation hamburger fry. Tables will be set up to enjoy the meal, and hamburgers will start coming off the grill around 5 p.m. and will continue to be served until 7:30 p.m.

Sincerely,

*Dave & Cindy
& Crew*

**CATTLEMEN'S
CONNECTION**

Dear Cattle Producers:

It has been my pleasure to work with the Judd Ranch crew for nearly forty years. I like working for Dave, Cindy and their family because of their honesty, dedication and how high they set the bar every day. I've mentioned this before but a handshake from Dave Judd is better than a legal contract with many others.

Producers, you are about to make one of your most important decisions for the year and it is centered around buying quality bulls for your program. I want you to consider some of the following when selecting your next seedstock supplier. When you combine Dave Judd's honesty, accurate record keeping, practical approach to breeding functional purebred cattle, his overall knowledge of all phases of the livestock industry, you have a superior seedstock supplier. One of the main reasons so many Judd Ranch customers return to purchase their bulls every year is because they trust the honesty and integrity that are the foundation to the Judd Ranch program. Another important reason to choose Judd Ranch as your genetic supplier is the strength of the cowherd or true Cow Power featured at Judd Ranch. As you look through this catalog, you will find several photos of Judd Ranch females and please notice they are easy fleshing, deep-ribbed, calf raising machines with incredible teat and udder quality. Also note, all females photographed in this catalog are Judd Ranch bred.

Judd Ranch has been honored as the #1 Dam of Merit program in the Gelbvieh breed for 21 of the past 28 years ('98-'25). Dam of Merit females are honored for their unsurpassed fertility and performance levels. As always, AI continues to be an integral part of the Judd Ranch program and you will note 99% of the bulls in this offering, are sired by breed leading proven AI sires. This combination of Judd Ranch's honored Dam of Merit females and proven breed leading AI sires offers you tremendous financial rewards in your next calf crop, and you will reap even more substantial benefits when you incorporate Judd Ranch Gelbvieh genetics into in your base cowherd.

If you have questions about any bull listed in this sale catalog or would like assistance in selecting bulls for your program; please give me a call toll-free 1-800/743-0026. Prior to the sale I personally go through and grade each sale bull and write detailed physical notes on each. This process usually takes five to six days. If you are unable to attend the sale, I will be happy to purchase a bull or several bulls for you, within your price range, and we will guarantee your satisfaction with the animal(s). Historically, approximately 25% of the gross sales are purchased through this free and time saving program, and you pay only the bid price, just as if you were bidding for yourself.

You can reach me at 1-800-743-0026 or 785/547-6262 by March 2nd, after that you can call me on my cell phone at 785/547-6262 during the day. In the evenings, please call either my cell phone 785/547-6262 or the sale motel headquarters, Holiday Inn Express & Suites in Ottawa, Kansas 785/521-7009.

Respectfully,

Roger

PHONE: (785) 242-7822
FAX: (785) 242-0216

Dear Cattleman,

I have had the opportunity to work closely with David Judd for 38 years on herd health. Don't miss this opportunity to inject into your cattle operation some of the best genetics found anywhere that will influence your herd performance for years to come. Traits that will put your cattle in demand in the sale ring and feedlot.

Herd health is one of the most important aspects of a successful cattle operation, much like our own health that we often take for granted. Judd Ranch wants the best performance and production for this herd. That is why preventive medicine is so important to the Judd family.

The bulls in this sale all passed Breeding Soundness exams (BSE) based on the following criteria: Scrotal circumference, pelvic palpation to check for any abnormalities or medical problems in the reproductive glands. Testicles are measured and examined, electro-ejaculation is used to collect semen and examine penis for breeding soundness, concentration and mobility of semen is examined. All the bulls have been BVD- PI tested and are negative.

Trichomonas Foetus (Trich) is a reproductive disease that spreads from infected bulls to cows and causes abortion. Several states require that bulls as young as twelve months be tested prior to importation into that state. All bulls offered in the sale are virgin bulls and considered Trich free and will not be tested for Trich prior to sale. If you have any questions regarding the health requirements for bulls entering your state, please contact me or your local Veterinarian before making transportation arrangements for the date of the sale.

Dave and I feel very strongly about the sale of healthy and sound bulls. We believe that by selling a bull that may be a questionable breeder, we not only put the Judd Ranch reputation on the line, but we may be destroying calf crops. Only sound bulls will be offered for sale. I strongly recommend that although these bulls have passed a B.S.E. in January and February they be re-examined prior to turn out this spring.

If you have any questions regarding the health of these bulls and this herd, please contact me at 785-742-7822 or 785-248-6225. I look forward to seeing you all sale day and good luck this calving season.

Larry E. Mages, DVM

To Whom it may concern:

Traveling the country over the past 20 years Ultrasounding Cattle I have seen many different types and breeds of cattle that vary greatly in carcass traits and phenotypic quality. I have Ultrasounded the bulls for the last several years and have seen that Judd Ranch Bulls possess exceptional carcass traits in a very functional package. It has always been exciting for me to evaluate cattle of any breed and what they offer to the Beef Industry.

On March 7 cattlemen will have the opportunity to purchase genetics that will improve any herd, whether you are a seedstock producer or a commercial producer that retains ownership of your calves through finishing you will find bulls that will fit your program. It has been proven that 1 square inch of Ribeye area per hundred pounds of body weight to be average for muscling. The Judd Ranch Bulls will greatly exceed that while maintaining high %IMF values. Translation, these bulls will add muscle in their offspring lowering numerical yield grades while still maintaining optimal quality grades. As we move to more challenging market conditions it is critical that producers find genetics that are efficient and have the ability to produce pounds of product in a timely fashion. Cattlemen will certainly find these genetics at Judd Ranch on March 7.

It is always my pleasure to go to Judd Ranch to ultrasound bulls that are very quiet in disposition while working with an outstanding family. As you make your selections for purchase buy with confidence, you are not only buying quality bulls, you are buying from a program that will work in any operation that has been time tested to produce superior cattle and the Judd's will stand behind them.

Best Wishes,

Chad Gordon

HOW TO PARTICIPATE ON

LiveAuctions.TV

1 CREATE AN ACCOUNT

Click "Register to Bid" on the top right corner of LiveAuctions.tv. Fill out the required information to bid online. Agree to the terms of service and finish with the "register" button.

2 REGISTER FOR A BUYER NUMBER

From the home page or the "all auctions" page, choose the sale you're interested in. Once selected, click the "request a buyer number" button. Verify your email address with the email verification link. To verify your mobile number, click "send token". Follow the steps to authorize your mobile device and click "submit".

3 BID SUCCESSFULLY

You will only have to complete the two-step verification process one time. After that, you will be able to immediately request a buyer number on any auction without verification. If you're a winning bidder, your lots will appear in your cart on the bottom of your screen. You will be contacted by the ranch or sale manager for your payment and shipping plans.

IF YOU NEED HELP REGISTERING TO BID OR TO VIEW
THE AUCTION PLEASE CONTACT TECHNICAL SUPPORT

(682) 816-4900

OR

TECHSUPPORT@LIVEAUCTIONS.TV.

Another Option...Use Our Sale Day Conference Line

Of course, our preference is to have you join us in Pomona on March 7, but we understand traveling is not an option for all of our customers. Along with being able to watch and bid on LiveAuctions.tv, we will also have a Sale Day Conference line that customers can call in on and bid.

1. If you wish to bid by phone, please call Ashley Judd at 785-248-6005 or Ginger Judd 785-229-9266, so we can assign you a bidder number and give you the sale day conference line number. We recommend you call at least by Friday, March 6 to get your bidder number. In case of an emergency, Saturday morning requests can be accommodated.
2. On sale day, call the conference line number. Sale starts at 12:00 (noon) Central Time. We will have a representative standing by to assist you on the conference line, starting approximately 15 minutes before the sale starts.
3. Once you are on the line, state your name and bidder number to the Judd Ranch representative so that we know you are on the line.
4. When you are ready to bid, say "yes" and your bidder number. For example, if your bidder number is 230, you will say "yes, bidder 230" when you are wanting to bid.
5. If you are the winning bidder, our representative will tell you that you bought the animal, and you will be contacted by Judd Ranch after the sale regarding payment, animal pick up or delivery.
6. If you would like to mute your line, dial *6. To unmute your line, dial *6 again.

JRI Ms High Profile 170D81

JRI Ms First Instinct 170A71 (JRI Ms 170P61)

- Wow, you talk about a young powerhouse Judd Ranch herd sire who possesses all the profitable traits. Relentless features a calving ease 85# birth weight, whopping 997# 205-day weight, scalebusting 1,205# actual weaning weight, and the meatwagon pounded the 365-day weight scales at 1,502 pounds. Now pencil-in the meatwagon's feed conversion-plus 7.08# ADG, big ol' 42.2 centimeter yearling scrotal circumference and Relentless scanned a mighty impressive carcass-plus 18 square inch yearling ribeye. Fertility ranks as the most important trait in the beef industry and rest assured, Relentless is well equipped in the all-important fertility department as his Dam of Merit honored third-calf dam featured a remarkable 354-day annual calving interval at 4 years of age.

JRI Ms Black Secret 214U88

JRI Ms Lucky Star 214R78 ET (JRI Ms 214G6)

- This breed leading powerhouse homozygous polled AI sire has worked fabulous at Judd Ranch in producing extreme calving ease coupled with performance plus growth. JRI Marshall 214X2 nursed a fertility-plus first calf heifer and I'd call his mama a calf raising machine as Marshall weaned off at 82% of her body weight and that's flat called Judd Ranch Cow Power. Marshall posted an awesome low birth to yearling growth spread with his calving ease deluxe 79 pound birth weight coupled with a scalebusting 1,273 pound yearling weight. Marshall's a breed trait leader for Calving Ease, (low) Birth Weight, Calving Ease Maternal, Docility, and Marbling. Marshall's calf raising machine dam was honored as a Dam of Merit female in her first year of eligibility and as an Elite Dam of Distinction honored female in her first year of eligibility.

JRI Miss Me 253Z22

JRI Ms Cupcake 253X82 (JRI Ms 253S71)

- This calving ease/powerhouse General Patton son was Judd Ranch's pick of the spring 2020 bull calf crop. Bandito swept 2021 National Champion Bull honors for Judd Ranch, and oh man, the Bandito progeny are mighty impressive. Bandito's stats: calving ease 86# birth weight, whopping 955# actual weaning weight off his 8-year-old dam, scalebusting 1,377# 365-day weight, huge 43.2 centimeter yearling scrotal circumference. Now pencil-in Bandito's phenomenal yearling scan data where the calving ease/powerhouse scanned a humongous 17.8 square inch yearling ribeye with a carcass-plus 5.1 IMF. Rest assured, the all-important fertility factor is bred-in Bandito as his incredible 8-year-old dam produced 21 natural & ET born calves with a remarkable 368-day annual calving interval.

JRI Real Deal 282M360 nursed a first-calf Bandito daughter, JRI Ms Dominique 282K360, who sports a picture-perfect 99 teat/udder score and Ms Dominique excels in the cow efficiency department as Real Deal weaned off at 80.2% of her 1,160# body weight. Real Deal's phenomenal stats: calving ease 74# birth weight, ripping 787# 205-day weight, whopping 930# actual weaning weight, scalebusting 1,298# 365-day weight and Real Deal is well endowed with a 40 centimeter yearling scrotal circumference. Real Deal's first-calf dam's unbelievable producing ability comes as no surprise as she features six Dam of Merit honored grandams. **Photographed at 10 months of age.**

Quotes from Judd Ranch Bull Buyers

-Judd Ranch genetics hit the mark in performance, frame score, and docility. "Holy cow, it is night and day difference," Justy says about his calves sired by Judd Ranch bulls. In one year we've improved weights by 100-lb. It's just amazing. - Justy Burleson, Ohio Commercial cow-calf producer

- With 100 to 150-pound increases in average weaning weights, Kansas cattle producer John Rose is a believer in the increased performance Judd Ranch bulls bring to a cow herd. Along with increased weaning weights, John says the calves are noticeably thicker and deeper-bodied. - John Rose, Kansas Commercial cow-calf producer

- Twenty years ago, Brent Bettels, Amoret, Missouri, made the decision to transition his Angus bull battery to Gelbvieh bulls, particularly Judd Ranch bulls. "Through the years, we have slowly switched all bulls from Angus to Gelbvieh - Judd Ranch Gelbvieh," Bettels says. "I keep buying Judd Ranch bulls because of the work that the Judd family puts into combining genetics to create bulls with off-spring that consistently perform." Bettels says using Judd Ranch bulls added at least 100 pounds to his weaning weights. "The Judd Ranch genetics continue to show up after weaning when I am backgrounding my calves," he explains. "I am able to add pounds efficiently with the Judd Ranch sired calves." When you buy Judd genetics you get both outstanding genetics and amazing service. "Working with the Judd family and Roger is easy," he explains. "My choices of who I do business with are deliberate. I do business with those who are honest, easy to work with and have a history of integrity. They check all the boxes." - Brent Bettels, Missouri Commercial cow-calf producer.

-Judd Genetics Make an Impact: Improve Weaning Weights, Docility. Judd Ranch bull customer Mike Jenkins purchased his first Judd Ranch bull in 2011. Mike's cow herd includes 250 mostly Angus and Brangus females. Mike's decision to buy a Gelbvieh bull was because of the value of heterosis and how the hybrid vigor of a Gelbvieh cross would benefit his operation. The Judd Ranch Gelbvieh bulls have added approximately 85 lbs. to all his weaning weights; they have added muscle, depth of body and all the replacement females are usually the first to breed in his herd. Mike Jenkins is sold on Judd Ranch bulls. Increased weaning weights, improved docility and daughters that are easy keepers, good uddered, good legged and raise good calves keep him coming back. "I'm very pleased with the Gelbvieh influence on my cow herd."-Mike Jenkins, Commercial cow-calf producer, Texas

- Judd Bulls Increase Average Weaning Weights 250 Pounds. Susan Gladstone Tucker from Gladcrest Farms recalls fondly March 3, 2012 – the day she bought her first Judd Ranch bull after years of evaluating Judd catalogs and looking for the perfect herd bull candidate. Since the initial purchase in 2012, to 100% Judd Ranch bulls in 2018, average weaning weights have increased from 426 lbs. to 679 lbs. in 2018. Along with the steer calves Susan says the Judd Ranch-sired females are excellent. "We retain about 15 to 20 per year," she says. "When we started using Judd Ranch bulls you could easily tell which ones were sired by them."-Susan Gladstone Tucker, Missouri Commercial cow-calf producer

- "I can't say enough good things about Judd Ranch. I bought my first bull in 1990 and now my whole herd is based on Judd genetics. Last year, because of those genetics, I weaned off bull calves that weighed more than 1,000 lb. My herd is proof that you can start with a group of bad cows and after years of buying Judd Ranch bulls you can have a herd you are proud of." - Joe Peine, Commercial cow-calf producer, Kansas

Whoa, check out the birth to growth spread on this meat machine Relentless son: calving ease deluxe 70# birth weight, whopping 879# 205-day weight and the meat machine pounded the 365-day weight scales at 1,300 pounds. JRI Rasin Steaks 285M370's second-calf General Patton dam, JRI Ms Perfect Harmony 285J870 flat knows how to raise babies as her first baby, JRI ROTC 285L370 (full brother to Rasin Steaks) featured a 72# birth weight, whopping 841# 205-day weight and the beef machine pegged the actual weaning weight scales at 970 pounds. Ms Perfect Harmony excels in the all-important fertility department as she shortened her gestation 20 days with her fall '25 Relentless son that weighed in with a calving ease 76# birth weight. Oh, I might add, Ms Perfect Harmony excels in the teat/udder department with a 99 teat/udder score.

When you weigh calves at birth like the Judd Ranch crew, you're going to weigh a calf occasionally with a little more birth weight like this beefpacker. JRI Clint Black 35M242 nursed a beautiful second-calf Basin Payweight daughter who does not feature added birth weight in her genetic makeup as her first beefpacker weighed in with a calving ease 79# birth weight, so I would not shy away here. Clint Black sells fully equipped with all the profitable traits as the beefpacker pounded the actual weaning weight scales at 992 pounds and crushed the 365-day weight scales at 1,325 pounds. Now pencil-in the all-important fertility trait as his second-calf dam features a 365-day annual calving interval

Wow, you talk about a beefpacking machine Relentless son who sells fully equipped with all the profitable traits. JRI Rendezvous 47M27 pounded the actual weaning weight scales at 1,100 pounds and the beefpacker hammered the 365-day weight scales at 1,334 pounds. Rendezvous posted a feeder delite 4.64# ADG and his progeny should produce plenty of carcass premiums with the big ol' 16 square inch yearling ribeye Rendezvous scanned. Now pencil-in the all-important fertility and teat/udder excellence factors as Rendezvous' 6-year-old dam, JRI Ms Patton 47F27 possesses a nearly unmatched 98 teat/udder score and she's been honored as a Dam of Merit female in every year of eligibility ('23 thru '25).

JRI Carbon Copy 68M322's performance levels are off and they're out of the norm as his 4-year-old dam, JRI Ms Ruby 68H322 ET usually strolls home with a scalebuster. Ms Ruby's first baby, JRI Midnight Rain 68K222 sold in the '23 sale and the meat machine featured a calving ease 75# birth weight coupled with a scalebusting 1,362# 365-day weight. As noted above, Ms Ruby knows how to raise the scalebusters and it comes as no surprise as Ms Ruby would be an ET full sister to Judd Ranch's powerhouse herd sire, JRI Alan 68G3 who posted a scalebusting 1,065# actual weaning weight off his first-calf dam. Be assured, the fertility is bred-in as Carbon Copy features 3 DOM honored grandams.

Producers, if you study pedigrees you'll note, JRI Point of Reference 253M326 ET as an ET black, full brother to JRI Bandito 253H32, Judd Ranch's incredible calving ease/powerhouse herd sire. Point of Reference's black ET full brother, JRI Performance Plus 253M328 ET sells as Lot 12. Donor dam, JRI Miss Me 253Z22 produces unbelievable calving ease/powerhouse sons and her daughters are fertility-plus/calf raising machines with superior test/udder quality. Point of Reference should flat spread your birth to growth ratios and if you retain your feeders, Point of Reference progeny should excel in the feedlot and on the rail.

JRI Passport 132M340 posted some mighty impressive stats, especially if you consider Passport was twin born. Judd Ranch had the misfortune of losing Passport's twin brother, but be assured, Passport's first-calf dam, JRI Ms Fairbanks 132K240, could have raised both her twin babies. Ms Fairbanks features a flawless 99 test/udder score and fertility, producing ability and test/udder excellence runs mighty deep as Ms Fairbanks features three DOM/DOD honored grandams. Flip to page 46 where you can view one of Ms Fairbank's incredible grandams and note her test/udder excellence.

JRI Private Stash 68M313 ET would be an ET son out of JRI Ms Pride N Joy 68G214, Judd Ranch's incredible 5-year-old donor female. Ms Pride N Joy's first baby, JRI Military Man 68J314 (full brother to Private Stash) sold in the '23 bull sale as Lot 112 and the meatwagon featured a 69# birth weight, scalebusting 1,310# 365-day weight, big-time 5.70# gainer and the meatwagon scanned a big ol' 15.3 square inch yearling ribeye. As noted, Ms Pride N Joy flat knows how to produce meatwagons and six ET full brothers to Military Man sell as Lots 33, 35, 72, 95, 100 & 101 and producers, these meatwagons feature a scalebusting 989# actual weaning weight average. Ms Pride N Joy's incredible producing ability and fertility come as no surprise as she features two DOM/DOD honored grandams.

If you like big ol' juicy ribeye steaks, progeny out of this beefpacking machine Real McCoy son should keep your freezer well stocked with the humongous 16.3 square inch yearling ribeye the beefpacker scanned. JRI Cowboys N Indians 246M3's big ol' yearling ribeye and carcass-plus 3.4 IMF should produce plenty of carcass premiums and his progeny should be scalebusters at weaning time as Cowboys N Indians pounded the actual weaning weight scales at 940 pounds. Rest assured, the fertility is bred-in as Cowboys N Indians features six DOM honored grandams.

Oh man, you talk about a beefpacker who sells fully loaded with all the profitable traits: calving ease 81# birth weight, whopping 806# 205-day weight, conversion-plus 4.93# gainer and the beefpacker scanned a big ol' 15.4 square inch yearling ribeye. Now pencil-in the all-important fertility and excellent test/udder factors as JRI Pending Approval 254M4800's second-calf dam possesses a 99 test/udder score, and she shortened her gestation 18 days with her fall '25 baby born on August 5th. Rest assured, fertility runs mighty deep as the beefpacker features seven DOM honored grandams.

Wow, check out the awesome stats on this beef machine General Patton son: calving ease 79# birth weight, whopping 749# 205-day weight and the beef machine posted a feed conversion-plus 5.24# ADG on gain test. JRI Pershing 254M17's stats come as no surprise as his 8-year-old DOM dam, JRI Ms Touch of Class 254D97 produces beef machine sons and calf raising machine daughters. One such Ms Touch of Class daughter would be, JRI Ms Sneek Peek 254F17, and her son sells as Lot 3 with a 78# birth weight, scalebusting 1,010# actual weaning weight.

Check out the calving ease 74# birth weight coupled with a performance-plus 1,267# 365-day weight and producers, the beefpacker nursed a first-calf heifer. Fertility and spreading birth to growth run mighty deep in this prolific Judd Ranch 254 cow family that features 111 fertility-plus/calf raising machine daughters. Well, JRI Reactor 254N31 sells well equipped in the all-important fertility and calf raising machine departments as he features five Dam of Merit honored grandams. Four of Reactor's Dam of Merit honored grandams 254Z28, 254N72, 254E52 & 254C4 were four of the all-time great donor females at Judd Ranch with the foursome producing 157 natural & ET born calves and that 157 figure is not a typo. JRI Renaissance 254N234 will be among your top picks on sale day and oh man, Renaissance features a fertility-plus/calf raising machine dam. Renaissance's fifth-calf dam, JRI Ms Charlee 254G234 sports a fertility-plus 361-day annual calving interval and Ms Charlee produces super stud sons. Ms Charlee's '23 son, JRI Smart Asset 254L234 (full brother to Renaissance) sold as Lot 241 in the '24 bull sale and the meatwagon featured a whopping 980# actual weaning weight, an amazing 80% of Ms Charlee's 1,230# bodyweight. Wow, just think of your increased profitability if you had 361-day annual calving interval females weaning off 80% of their bodyweight. Flip to page 43 where you can view one of Renaissance's incredible DOM honored grandams.

Producers, if you're needing to boost your performance and all-important fertility levels JRI Rifleman 285N352 should be well equipped as the meat machine pegged the actual weaning weight scales at 1,020 pounds and flat hammered the 365-day weight scales at 1,449 pounds. Now pencil-in the all-important fertility factor as Rifleman's fourth-calf dam, JRI Ms Sunkissed 285H352 has been honored as a Dam of Merit female in every year of eligibility. Rifleman did weigh 93 pounds at birth, which is totally out of the norm for his DOM dam, as her four babies have only averaged 81 pounds at birth. Fertility and calf raising machine genetics run mighty deep as Rifleman also features two DOM honored grandams.

Oh man, you talk about a beef machine who sells fully loaded with all the profitable traits: calving ease 73# birth weight, whopping 900# actual weaning weight (69.5% of his 10-year-old dam's 1,295# bodyweight) and the beef machine pegged the 365-day weight scales at 1,264 pounds. Now pencil-in Reliable's feed conversion-plus 4.73# ADG and Reliable progeny should really excel on the rail as the beef machine scanned a big ol' 15.8 square inch yearling ribeye with a carcass premium 3.9 IMF. Reliable's 10-year-old dam, JRI Ms Santa Rosa 207C53, is one fertile machine with a 365-day annual calving interval and Ms Santa Rosa's unmatched fertility and producing ability come as no surprise as she features three Dam of Merit honored grandams.

Wow, you talk about a meatwagon who sells fully equipped with profitable traits: whopping 915# actual weaning weight coupled with a scalebusting 1,289# 365-day weight. Now pencil-in the all-important fertility and excellent teat/udder traits as Ribeye's 8-year-old dam, JRI Ms Honeysuckle 254E94, possesses an unmatched 99 teat/udder score and Ms Honeysuckle has been honored as a Dam of Merit female in every year of eligibility. Some might back off Ribeye because of his 93# birth weight, but I'd suggest not as his DOM dam has been a birth weight moderator as her seven babies have only averaged 83 pounds at birth. Ribeye's full brother sold as Lot 226 in the '24 sale and the meatwagon featured a calving ease 79# birth weight with a whopping 1,030# actual weaning weight.

Wow, you talk about a meatpacking machine who sells fully loaded with profitable traits: whopping 920# actual weaning weight coupled with a scalebusting 1,348# 365-day weight. Profitability in the feeding sector all stems around performance, feed conversion and added carcass values. Well, Porterhouse progeny should excel in the feed conversion department as the meatpacker posted a 4.82# ADG and his progeny should produce big-time carcass dividends as the meatpacker scanned a 16 square inch yearling ribeye with a money in the bank 4.4 IMF. Now pencil-in the all-important fertility trait as Porterhouse nursed a Dam of Merit honored dam and he also features three DOM/DOD honored grandams.

Oh man, you talk about a "heifer bull" who stems from a fabulous fertility-plus/cow efficiency cow family. JRI Ez Does It 68N265 offers you superior calving ease with his 61# birth weight coupled with top 4% calving ease direct EPD strength. Ez Does It's first-calf dam, JRI Ms Picking Petals 68L65 sports a flawless teat/udder system (99 teat/udder score). Unmatched fertility is also standard equipment in this prolific Judd Ranch 68 cow family as Ez Does It features four fertility-plus/calf raising machine Dam of Merit honored grandams. I mentioned cow efficiency above and Ez Does It's first-calf dam excels in the cow efficiency department as Ez Does It weaned off at 64.5% of his dam's 1,140# bodyweight.

Whoa, check out the stats on this beefpacking machine Rawhide son: calving ease 80# birth weight, whopping 975# actual weaning weight coupled with a scalebusting 1,396# 365-day weight. Producers, if you're feeding out your calves, profitability stems around performance, feed conversion and added carcass values and progeny out of this beefpacker should excel as the beefpacker posted a 5.64# ADG and note his humongous 17.7 square inch yearling ribeye. Now pencil-in the all-important fertility factor as Rowdy's 8-year-old dam, JRI Ms Sweet Thing 254E827 ET, possesses a fertility-plus 365-day annual calving interval. Ms Sweet Thing's unmatched fertility and producing ability come as no surprise as she features a DOM/DOD honored dam and two DOM/DOD honored grandams. (RC)

If you want to flat boost your all-important fertility and performance levels, JRI American Classic 406N43 should be well equipped as the meat machine hammered the 365-day weight scales at 1,368 pounds. Now pencil-in the all-important fertility trait as American Classic's 6-year-old dam, JRI Ms Paisley 406G63, has been honored as a Dam of Merit female in every year of eligibility. Ms Paisley's DOM honors come as no surprise as she features a DOM dam and three DOM honored grandams. American Classic should produce the scalebusters at weaning time and save his replacement daughters as they should be fertile machines.

The NEXT Generation at Judd Ranch

Judd Ranch Customers Profit from Selling on the Grid

Judd Ranch bull customers who have been following their Gelbvieh-influenced and Balancer-influenced fat cattle on the rail and selling on the grid have found that their Judd Ranch-influenced Gelbvieh- and Balancer-influenced cattle out perform the U.S. industry average of 7 to 8 percent Prime and 70 percent Choice.

Travis Olson, Triple O Ranch, South Dakota has been purchasing Judd bulls for six years when wanting it all - performance (pounds) and carcass quality - Travis started his search for a new bull supplier for his family's 300 head Angus-based females. This led him to making the 600-mile drive to Pomona to check out the Judd Ranch program. Impressed with what he saw, the Olson's have been a customer ever since. Travis says the Judd bulls increased averaged finished weights 50 to 75 lb. per head. That's more than 15,000 total pounds - money in the bank. As farmer-feeders, the family's goal is to finish calves at 13 months of age. The family is excited about the carcass results of their 2020 calf crop that averaged 86% Choice or higher. Sold on the Judd Ranch program, Travis summarizes, "If you are feeding and finishing straight Angus cattle, I highly recommend you try a Judd Ranch Gelbvieh bull and see how much you will gain."

2021 Triple O Ranch Carcass Data - All sired by Judd Ranch bulls

Avg. Harvest Weight		Avg. ADG	Avg. Yield	Avg. Quality Grade
155 Heifers	1,300 lb.	3.33 lb./day	63%	87% Choice or better
145 Steers	1,425 lb.	3.65 lb./day	63.25%	86% Choice or better

Gerald Merz from Missouri has had a similar "happy camper" experience selling his Gelbvieh- and Balancer-influenced fats on the grid. Every steer in Gerald's first load of 36 head of fats in 2018 graded Choice or better, with 14 of the 36 grading Prime and 11 qualifying for the CAB program. Sired by Judd Ranch purebred Gelbvieh bulls and out of Angus cows, these steers were what Gerald calls "the industry's highly desired Continental X British crosses." In another group of Judd Ranch Gelbvieh- and Balancer-influenced fats, 11 out of 18 went Prime and four or five went CAB. All were Choice or higher. The Missouri cattleman's formula for success: Judd Ranch purebred Gelbvieh and Balancer bulls on Angus and Angus X Judd Ranch-influenced females. "I've been using performance bulls for more years than I can count and have been retaining ownership and selling on the rail for 15 to 20 years. I figure I can either get paid for my better genetics or someone else will," Gerald explains. "With the dryness, I've been weaning the middle of August. The calves go on silage and a little corn. They stay on that ration, and I increase their corn as they get bigger. They're 17 to 18 months old when they are harvested. "As the kill sheets show, Judd Ranch Gelbvieh-sired and Balancer-sired cattle are definitely performing mighty fine on the rail for me."

Bill and Kathy Stoltz, BK Ranch, Wisconsin, are among the cow-calf producers who expect more from their Gelbvieh-influenced cattle and simply wouldn't be happy if only 7 to 8 percent of their fat cattle went Prime. "We're getting right at 50 percent Prime, and it's been a long time since we had any cattle grade less than Choice," Bill explains. The cattle that have been performing so well on the rail for Bill and Kathy are "more Gelbvieh than anything else." The Stoltz's cow herd has a "bit of Angus" in them and a whole lot of Judd Ranch Gelbvieh. Bill adds that, the last five to six years, they have been using purebred Gelbvieh bulls. "If people think Gelbvieh and Balancers won't grade, then they might want to pick different bulls," Bill interjects. "A lot of how cattle grade hinges on picking the right bulls. I am really fussy about buying bulls with good carcass values, and that has been paying off."

Tracy Lake, a cow-calf producer from Idaho, has been using Judd Ranch bulls for close to 20 years. He's also been feeding out cattle and selling them on the grid for the same amount of time. His 1,500 head of mother cows are black crossbreds, primarily Gelbvieh X Simmental or Gelbvieh X Angus. Using Charolais bulls on his Judd Ranch-influenced Gelbvieh cross females, his calves are averaging 61 to 64 percent on yield. Tracy estimates that, on average, his steers hit about 10 percent Prime and 70 percent Choice — or better. "Genetics are important, and feed is equally important," he tells. "We like to turn over the cattle. As soon as we think they will grade, they sell on the grid." Tracy attributes being successful on the grid to two factors: genetics and feed. And he's adamant that it takes a darn good cow to produce a good calf that performs start to finish. "We love our Gelbvieh-influenced cows," he continues. "I can't say enough good about our Gelbvieh crossbred cows. Their calves perform well on the rail."

Mark Wray started feeding cattle when he got out of college. At first, he purchased what he thought were "really good calves" from the auction barn. But, despite the calves being Angus, he said they were missing the boat when they hung on the rail. "Then I heard a guy giving a presentation say that the best animal you can feed is a Continental X British cross, and that got me to thinking," Mark elaborates. "I knew Judd Ranch just down the road had the best Continental cattle out there and I could raise my own cattle and benefit from selling them on the grid. Plus, I could improve my cow herd at the same time. "So, I started buying Judd Ranch bulls — purebred Gelbvieh — and putting them on our 300 Angus mama cows. I knew that with Judd Ranch bulls I would get bulls that excel in maternal traits and growth traits and my calves would be that highly desired Continental X British cross." This commercial cowman from Kansas says his first set of home-raised Judd Ranch-influenced Continental X British cross calves hung on the rail "really well." "But the big benefit to using Judd Ranch bulls was once my Judd Ranch-influenced heifers were in production," he explains. "For the past three years, I've been putting Judd Ranch Balancer bulls on my crossbred (Angus X Gelbvieh) females and 'Wow!'. Our yield on those calves went up a full percent. "That's a \$20 to \$30 a head premium." Mark adds that, year in and year out, 10 to 11 percent of his calves are grading Prime and another 80 percent are grading Choice. That's 90 to 91 percent consistently grading Choice or better. He points out that Judd Ranch genetics are giving him the yield he needs to sell on the grid, without sacrificing quality grade. "We've been using Judd genetics to make better mama cows, and we're picking up some yield at the same time," Mark states. "The myth out there that Gelbvieh or Balancers won't sire calves that will work on the grid is not accurate. It's just that — a myth. It's a false belief. "Our calves and the premium we've been getting are proof that Gelbvieh-cross and Balancer-cross calves work on the grid. Heck, I sure enjoy that extra \$20 to \$30 per head."

Judd Ranch Mamas Flat Know How to Raise the Scalebusters

Producers when you have Gelbvieh cross females (heifer calves, bred heifers or cows) for sale, give Ashley Judd a call at 785-248-6005. We receive calls throughout the year looking for replacement Gelbvieh cross females and we'd love to help you place them at NO COST on Judd Ranch's Website! www.juddranch.com

Genomic-Enhanced EPDs: Why They Add Real Value on Sale Day

Expected Progeny Differences (EPDs) are the beef industry's best tool for comparing the genetic merit of breeding stock because they predict how a bull's calves will perform relative to breed contemporaries. Accuracy around those predictions matters because it determines how much an EPD is likely to change as more data accumulate.

Genomic-enhanced EPDs (GE-EPDs) takes that a step further by incorporating DNA marker information directly into the genetic evaluation alongside pedigree and performance records. In practical terms, buyers aren't just purchasing a bull with a pedigree and weights—they're investing in a bull whose EPDs already reflect what his DNA says about traits like calving ease, growth, and carcass merit. That added genomic information reduces risk by boosting EPD accuracy, particularly in young, low-progeny animals.

How much does accuracy improve? Multiple breed and extension resources show that adding genomics can be roughly equivalent to having several progeny records already in hand—often on the order of a single calf crop for some traits—meaning less re-ranking shock later as data roll in. The net effect is tighter confidence around selection decisions made today.

The value shows up in two ways for commercial cattlemen. First, GE-EPDs sharpen selection for economically relevant traits before the first calves hit the ground, which gets producers closer to their target—whether that's lighter birth weight with growth, improved maternal function, or better grid performance. Second, genomics supports parentage verification and cleans up pedigree risk; inaccurate pedigrees can erode EPD accuracy and misdirect selection.

For decades, Judd Ranch has built a reputation around data integrity, customer trust, and proven performance. From the ranch's extensive record-keeping to its transparent herd health program, every decision centers on giving buyers confidence in the cattle they purchase. Offering genomic-enhanced EPDs on every bull selling in the 48th annual sale continues that standard of accuracy and accountability that Judd Ranch customers have come to expect.

Because genomics increases accuracy early in an animal's life, it shortens the generation interval and speeds the rate of genetic progress across a cow herd. That compounding advantage is why breed associations—including the American Gelbvieh Association—incorporate genomic data into their evaluations and promote GE-EPDs to reduce buyer risk and increase confidence at the point of sale.

The bottom line for March 7: Every bull selling in the 48th Judd Ranch Bull Sale will sell with genomic-enhanced EPDs. For buyers, that means more reliable predictions, fewer surprises, and faster progress toward marketing and production goals—right out of the gate.

A recent research paper in the Journal of Animal Science, which evaluated 18 separate breeds, found Gelbvieh-sired females produce nearly 23 more pounds of calf at weaning than any other British or Continental breed.

Increase Calf Crop Profit Using Homozygous Polled Bulls

Judd Ranch is always striving to add more value to your next calf crop. Homozygous polled bulls can reduce management issues and increase the value of your calves in the marketplace.

Tom Troxel, Arkansas extension beef specialist, says research shows that horned calves marketed at weaning age were discounted \$8/ cwt. On a 500-weight calf, that's \$40 removed from your pocket when you sell a horned calf. Turn the scenario around. That means if you sold polled calves, no discount would have occurred and you would benefit with getting that \$40 per head in your pocket. On a group of 50 calves, that's an additional \$2,000.

Data collected from nine Texas livestock auctions on 1,420 lots with 7,073 head shows that polled calves sold, on average, for \$22.87/cwt. more than their horned counterparts. That's \$114.35/head. On a group of 50 calves averaging 500 pounds/year, we're talking an additional \$5,717.50 just for selling polled or dehorned calves.

317 of the 327 Judd Ranch bulls selling on March 7 are Homozygous Polled.
