

Judd Ranch, Inc.

45th

Bull Sale

March 4, 2023

12:00 Noon

Judd Ranch, Inc.

Pomona, Kansas

FREE TRUCKING — When your purchases total \$20,000 or more, JRI will truck your bulls FREE within the continental United States and JRI delivers directly to your door, not to some central location miles away from you. \$20,000 or more going out of the 48 states will be trucked free of charge to the border. On purchases of less than \$20,000 trucking is usually very affordable because Judd Ranch bulls annually sell into 20 plus states.

QUALITY ACCEPTANCE GUARANTEE — JRI wants you to check out the bulls and see them for yourself. Thus, you will be reimbursed for your travel expenses if you arrive at the sale and don't find the sale bulls as described to you by our phone conversation. This is the only such money-back guarantee in the industry!

CUSTOMER APPRECIATION HAMBURGER FRY March 3 — To express our appreciation for your interest in our bull sale, we'd like you to join us for a complimentary pre-sale hamburger fry at the Ranch. We invite you to come early on Friday afternoon to view the bulls, then join us for a grab-and-go meal. Tables will be setup to enjoy the meal and hamburgers will start coming off the grill around 5 p.m. and will continue to be served until 7:30 p.m.

SALE DAY LUNCH — Be our guests at the Judd Ranch. Complimentary lunch will be served at 11:00.

TRAVEL — Judd Ranch is located 1 1/2 to 2 hours from Kansas City MCI Airport. Private landing at Ottawa Municipal Airport located three miles south of Ottawa and 15 minutes from Judd Ranch, Ottawa Municipal Airport phone (785) 242-5310.

RANCH LOCATION — 2 miles west of Pomona, Ks. on Hwy. K-68, or 12 miles west of Ottawa, KS on Hwy. K-68.

ACCOMODATIONS — Please call by February 28 and ask for reserved Judd Ranch Bull Sale rooms. All motels are located at the south end of Ottawa. From interstate 35 take Exit 183B north to the first stop light. turn right. **From Judd Ranch:** Go east to Ottawa on K-68 highway. At the west edge of Ottawa K-68 goes north...at that point turn south (right) on Eisenhower Rd. 2 miles to 23rd St. Go east (left) on 23rd St. one mile through traffic light and all four motel accomodations are located immediately to your right.

Sale Motel Headquarters
Comfort Inn-Ottawa (785) 242-6150 or (785) 242-9898
2335 Oak Street, Ottawa, KS

The Comfort Inn is a nice clean facility with an indoor pool and offers a complimentary breakfast including eggs, sausage and biscuits, waffles, coffee and fruit juice. Applebee's Restaurant is within walking distance. We highly recommend this new facility and please ask for the Judd Ranch Bull Sale special reserved rooms when calling for reservations before February 28.

Alternative Accommodations

Holiday Inn - Ottawa (785) 521-7009
Best Western - Ottawa (785) 242-2224
Econolodge - Ottawa (785) 242-3400
Super 8 - Ottawa (785) 242-5551

INSURANCE — Buyers, to protect your buying interest, shipping insurance is offered at settlement time. On our Free Delivery on purchases of \$20,000 or more we encourage you to purchase insurance. Our haulers have insurance but this insurance only covers the commercial value of your animals. Shipping insurance only covers death of the animal but given the minimal cost of such insurance we'd encourage all buyers to purchase it.

SIGHT UNSEEN PURCHASES — If you can't attend the sale and you want to buy, call: Judd Ranch Sale Consultant Roger Gatz (800) 743-0026 about our "Guaranteed to Please" Purchasing Agreement. Annually 25% of our gross sales are purchased through this time and money saving program. All bulls are guaranteed to meet your approval or you don't own them.

DNA Testing-Any animal DNA tested for homozygous black that are known red carriers will be designated with (RC). Any animal DNA tested for homozygous polled that are known to be heterozygous polled will be designated with (HP) at the end of the animal footnotes. Judd Ranch is retaining a 1/2 semen interest on all bulls selling. You are buying full possession and have the right to sell your bull at any time. If you decide to collect and sell semen Judd Ranch would receive 1/2 of the semen royalties. If Judd Ranch sells semen on said bull you would receive a 1/2 semen royalty.

On behalf of our committed family, welcome to the 45th Judd Ranch Herd Bull Sale. This year we will be selling 315 head and feel the 2023 offering to be the most uniform, extremely sound, highly functional, very fertile set of herd bulls with the most genetic potential ever at Judd Ranch. As always, all the top bulls have been saved for sale day, including our 2023 National Gelbvieh & Balancer Pen Show Grand Champion Pen of Five Gelbvieh, Reserve Grand Champion Pen of Five Gelbvieh, Grand Champion Pen of Three Gelbvieh, Grand Champion Pen of Five Balancer Bulls and Grand Champion Pen of Three Balancer Bulls.

At Judd Ranch we strive to produce and provide our highly valued customers with powerful genetics that have built-in basic fundamentals which defy the odds on antagonistic traits of which are geared for crossbreeding programs and act as a catalyst to produce progeny that are optimal and highly profitable for all sectors of the industry. We are proud of the genetic uniformity and balance of traits the Judd Ranch herd has achieved by stacking generations of like phenotypes and genotypes. We feel bulls that have stacked like pedigrees are the key to a predictable balanced gene pool that possess the prepotency to sire predictable uniformity in multiple traits. Therefore, we are confident the Judd Ranch bulls of today are a complete package of superior genetics that should breed true. Every bull has passed a breeding soundness exam and is guaranteed to breed cows and, as always, we stand behind each and every bull.

Facts and Statistics of 2023 Sale Offering

BSE Every bull in the sale has passed a breeding soundness exam (BSE) performed by Dr. Mages in February. However, we recommend a BSE just prior to turn out with cows. Especially if you are relying on a single bull per group of cows.

IMF SCORES 4.3 IMF Average for the Spring Bulls with 0.32 back fat and 3.6 IMF Average for the Fall Bulls with 0.21 back fat.

Frame Size Average 365 day adjusted frame score for Fall Sale Bulls, 5.6 and, 5.4 for all Spring Bulls. There should be bulls within most people's parameters for frame size.

Birth Weight And Calving ease Status 78 lbs. average on Fall Bulls, 79 lbs. average on Spring Bulls, gestation length has also shortened a lot over the years which also helps to reduce birth weight.

205 Day Weight Fall Sale Bulls average 773 pounds 205 adjusted weight and an average actual weaning weight of 879 pounds off the cow. Spring Sale Bulls average 716 pounds 205 adjusted weight and average actual weaning weight of 820 pounds off the cow.

Cows Actual % of Body Weight Weaned Fall Gelbvieh Cows with Bull Calves average 57%. Fall First calf Gelbvieh averaged 61%. Spring Gelbvieh Cows with Bull calves average 59%. Spring first calf cows with bull calves average 60%. We do not use any adjustments for the calf's age as we feel the cows that calve earlier in the season should get an advantage for fertility.

365 Day Weight Average for Fall Sale Bulls 1,192 pounds and Spring Sale Bulls 1,305 pounds.

Average Daily Gain on Test 4.48 ADG for all Fall Sale Bulls. 4.72 ADG for all Spring Sale Bulls. The bulls are weighed in right off the cow at weaning (no shrink applied, no warm up) and fed a high roughage ration which includes prairie hay, corn silage, alfalfa haylage and corn.

Adjusted 365 Day Ribeye Area 15.6 square inch average for Spring Sale Bulls and 14.6 square inch average for Fall Sale Bulls. 1.1 square inch of ribeye per 100 pounds of body weight off test, which is right on track.

365 Day Average Scrotal Circumference 37.3 cm Fall Bulls. 38.6 cm Spring Bulls. We feel large scrotals provide added fertility to females and males, along with early puberty on heifers.

Adjusted 365 Day Pelvics 182 cm Average on Fall Sale Bulls. 177 cm Average on Spring Sale Bulls.

Dam of Merit/ Dam of Distinction Status 100% of the Gelbvieh and Balancer sale bulls feature Judd Ranch honored DOM and or DOD cow family genetics.

Structural Soundness Freedom of movement and hoof size and correctness are traits we check closely and breed for. Also we run the Fall Bulls in large pastures after gain test, August – November, with no supplement feed. We feel this helps soundness and teaches the boys to get out and cover the country and learn to hunt for a living.

Polled/Homozygous Polled Status 100% of the sale bulls are polled. There are 302 head of homozygous polled bulls in the offering and 189 head of black polled bulls.

Disposition Status We also watch temperament closely at Judd Ranch and don't believe you will find a more docile set of bulls anywhere. However, there are usually a few bulls in the offering that we feel are not as docile as we prefer and will be announced as group bulls from the auction block.

PI BVD Judd Ranch has tested almost every calf (bulls and heifers) for the past 13 years and have all been negative. And all sale bulls are tested negative for PI BVD.

Johnes Judd Ranch is currently an Accredited Level 4 Johnes Free Status. Herd # 860580124

Brucellosis Judd Ranch is an Accredited Brucellosis Free Herd Certification #271. All cows and herd bulls are tested annually.

Trichomonas Testing We realize there are some states requiring a negative trich test on most bulls entering their state. **We recommend those of you from out of state please check your state's requirements before bringing your trailer as it takes a few days to complete the testing if required.**

One of Gelbvieh's biggest strengths is the cow power of the female. Yes, the Gelbvieh cow has the ability to raise scale smashing calves and be pregnant on schedule with another calf. Lee Leachman's data on over 200,000 cow records, of all breeds, puts Gelbvieh influence females number one for pounds of calf weaned per cow exposed every time. Also, Gelbvieh and Balancers cross extremely well with other breeds, as Gelbvieh and Balancer bring fertility, milk, reduced cow size, pounds of calf, good disposition, and optimum birth weight to the equation.

Cindy and I would extend a huge thank you to all our friends, neighbors, and crew who help with the sale and throughout the year! Especially, Roger and Peggy Gatz of Cattlemen's Connection for all their expertise, hard work and dedication to the Judd Ranch program, for 37 years. I would also like to extend a huge thank you to my family for their hard work and dedication to producing high quality seedstock. It takes all of us including Cindy, Nick, Ginger, Brent and Ashley putting in long hours and hard days doing all of the extra jobs that it takes to make a seedstock operation run smoothly. Just some of dotting the I's and crossing the t's include weighing and tattooing every calf, artificially inseminating every cow, running our embryo transfer program, preparing pen bulls and sale cattle, extra herd testing for health and fertility, accurate record keeping, feed production and storage, building fence and water systems and equipment and truck repair. Cindy and I are very proud of our family and appreciate all their hard work toward making Judd Ranch a success.

We are extremely grateful for our customers who are both great folks and some of the best cow people from across the country. Through the years many of you have become both our customers and very good friends. It is truly an honor and privilege to be your genetic supplier. It is always a pleasure to work with people who have a true appreciation for the land, the lifestyle and the almighty COW. You folks are to be commended for the tremendous job you do with your outfits and cowherds. You deserve the best and we wish you all the best. We hope you can make plans to come Friday, view the bulls and then join us for our annual customer appreciation hamburger fry. Tables will be set up to enjoy the meal and hamburgers will start coming off the grill around 5 p.m. and will continue to be served until 7:30 p.m.

Sincerely,

*Dave & Cindy
& Crew*

**CATTELMEN'S
CONNECTION**

Dear Cattle Producers:

It has been my pleasure to work with the Judd Ranch crew for over thirty-five years. Just a couple of reasons I like working for Dave, Cindy and their family are their honesty and how hard they work every day. A handshake from Dave Judd is better than a legal contract with many others.

Producers, buying quality bulls for your program is such an important process, I want you to consider some vital keys to selecting your next seedstock supplier. When you combine Dave Judd's honesty, accurate record keeping, practical approach to breeding functional purebred cattle, his overall knowledge of all phases of the livestock industry, you have a superior seedstock supplier. One of the main reasons so many Judd Ranch customers return to purchase their bulls every year is because they trust the honesty and integrity that are the foundation to the Judd Ranch program. Another important reason to choose Judd Ranch as your genetic supplier is the strength of the cowherd or true Cow Power featured at Judd Ranch. As you look through this catalog, you will find several photos of Judd Ranch females and please notice they are easy fleshing, deep-ribbed, calf raising machines with incredible teat and udder quality. Also note, all females photographed in this catalog are Judd Ranch bred.

Judd Ranch has been honored as the #1 Dam of Merit program in the Gelbvieh breed for 21 of the past 25 years ('98-'22). Dam of Merit females are honored for their unsurpassed fertility and performance levels. As always, AI continues to be an integral part of the Judd Ranch program and you will note 99% of the bulls in this offering, are sired by breed leading proven AI sires. This combination of Judd Ranch's honored Dam of Merit females and proven breed leading AI sires offers you tremendous financial rewards in your next calf crop, and you will realize even more substantial benefits when you incorporate Judd Ranch Gelbvieh genetics into in your base cowherd.

If you have questions about any bull listed in this sale catalog or would like assistance in selecting bulls for your program; please give me a call toll-free 1-800/743-0026. Prior to the sale I personally go through and grade each sale bull and write detailed physical notes on each. This process usually takes five to six days. If you are unable to attend the sale, I will be happy to purchase a bull or several bulls for you, within your price range, and we will guarantee your satisfaction with the animal(s). Every year, approximately 25% of the gross sales are purchased through this free and time saving program, and you pay only the bid price, just as if you were bidding yourself.

You can reach me at 1-800-743-0026 or 785/547-6262 until February 27th, after then you can call me on my cell phone at 785/547-6262 during the day. In the evenings please call either my cell phone 785/547-6262 or the sale motel headquarters, Comfort Inn in Ottawa, Kansas 785/242-6150.

Respectfully,

Roger

PHONE: (785) 242-7822
FAX: (785) 242-0216

Dear Cattlemen,

This is my 35th year working with Judd Ranch on herd health and fertility checking bulls. All bulls offered for sale in March have passed a Breeding Soundness Examination (BSE) based on the following criteria:

- Scrotal circumference and testicle examination.
- Pelvic measurement and checking for any abnormalities or medical problem in the reproductive glands. -Electro-ejaculation to collect semen and examine the penis.
- Microscopic evaluation of sperm for motility and concentration.

All bulls have been tested for BVD-P I and are negative. The herd is a designated Brucellosis free herd and is negative to date in the Joh n e' s Disease (paratuberculosis) program. Trichomonas Foetus (Trich) is a reproductive disease that spreads from infected bulls to cows at breeding time and causes abortion.

Most all western states have made it mandatory to have bulls tested before entering the state. To date these states are requiring bulls over 12 months of age to be tested: Arizona, Idaho, Utah, Nevada, New Mexico and Texas. States requiring bulls over 18 months of age to be tested are: Alabama, California, Colorado, Florida, Georgia, Mississippi, Oklahoma, Virginia, Washington, Oregon, Tennessee, West Virginia, and Wyoming. **All bulls in the sale are virgin bulls and considered Trich free and will not be tested prior to sale. If you state requires Trich testing, the bulls will be tested after the sale and will be delivered or picked up once the testing is complete.**

Cattlemen, rarely do you have a chance to improve your profit and genetics at the same time. Without a doubt, one bull from this sale will improve your herd for years to come. These bulls will improve your herd in more ways than any other decision you will make and will make your herd more profitable.

Dave and I feel very strongly about the sale of healthy and sound bulls. We realize that by selling a bull that may be a questionable breeder we not only put the Judd Ranch reputation on the line but we may be destroying a calf crop. Only sound bulls will be offered for sale. I strongly recommend that although these bulls have passed a BSE in January and February, they be re-examined prior to turn-out this spring.

If you have any questions regarding the health of these bulls and this herd, please feel free to contact me prior to the sale at (785) 242-7822 or (785) 248-6225. I look forward to seeing you at the sale and good luck this calving season. Sincerely,

Larry E. Mages, DVM

To Whom it may concern:

Traveling the country over the past 20 years Ultrasounding Cattle I have seen many different types and breeds of cattle that vary greatly in carcass traits and phenotypic quality. I have Ultrasounded the bulls for the last several years and have seen that Judd Ranch Bulls possess exceptional carcass traits in a very functional package. It has always been exciting for me to evaluate cattle of any breed and what they offer to the Beef Industry.

On March 4 cattlemen will have the opportunity to purchase genetics that will improve any herd, whether you are a seedstock producer or a commercial producer that retains ownership of your calves through finishing you will find bulls that will fit your program. It has been proven that 1 square inch of Ribeye area per hundred pounds of body weight to be average for muscling. The Judd Ranch Bulls will greatly exceed that while maintaining high %IMF values. Translation, these bulls will add muscle in their offspring lowering numerical yield grades while still maintaining optimal quality grades. As we move to more challenging market conditions it is critical that producers find genetics that are efficient and have the ability to produce pounds of product in a timely fashion. Cattlemen will certainly find these genetics at Judd Ranch on March 4.

It is always my pleasure to go to Judd Ranch to ultrasound bulls that are very quiet in disposition while working with an outstanding family. As you make your selections for purchase buy with confidence, you are not only buying quality bulls, you are buying from a program that will work in any operation that has been time tested to produce superior cattle and the Judd's will stand behind them.

Best Wishes,

Chad Gordon

HOW TO PARTICIPATE ON

LiveAuctions.TV

1

CREATE AN ACCOUNT

Click "Register to Bid" on the top right corner of LiveAuctions.tv. Fill out the required information to bid online. Agree to the terms of service and finish with the "register" button.

2

REGISTER FOR A BUYER NUMBER

From the home page or the "all auctions" page, choose the sale you're interested in. Once selected, click the "request a buyer number" button. Verify your email address with the email verification link. To verify your mobile number, click "send token". Follow the steps to authorize your mobile device and click "submit".

3

BID SUCCESSFULLY

You will only have to complete the two-step verification process one time. After that, you will be able to immediately request a buyer number on any auction without verification. If you're a winning bidder, your lots will appear in your cart on the bottom of your screen. You will be contacted by the ranch or sale manager for your payment and shipping plans.

IF YOU NEED HELP REGISTERING TO BID OR TO VIEW
THE AUCTION PLEASE CONTACT TECHNICAL SUPPORT

(682) 816-4900

OR

TECHSUPPORT@LIVEAUCTIONS.TV.

Another Option...Use Our Sale Day Conference Line

Of course, our preference is to have you join us in Pomona on March 4, but we understand traveling is not an option for all of our customers. Along with being able to watch and bid on LiveAuctions.tv, we will also have a Sale Day Conference line that customers can call in on and bid.

1. If you wish to bid by phone, please call Ashley Judd at 785-248-6005 or Ginger Judd 785-229-9266, so we can assign you a bidder number and give you the sale day conference line number. We recommend you call at least by Friday, March 3 to get your bidder number. In case of an emergency, Saturday morning requests can be accommodated.
2. On sale day, call the conference line number. Sale starts at 12:00 (noon) Central Time. We will have a representative standing by to assist you on the conference line, starting approximately 15 minutes before the sale starts.
3. Once you are on the line, state your name and bidder number to the Judd Ranch representative so that we know you are on the line.
4. When you are ready to bid, say "yes" and your bidder number. For example, if your bidder number is 230, you will say "yes, bidder 230" when you are wanting to bid.
5. If you are the winning bidder, our representative will tell you that you bought the animal, and you will be contacted by Judd Ranch after the sale regarding payment, animal pick up or delivery.
6. If you would like to mute your line, dial *6. To unmute your line, dial *6 again.

JRI Ms Pld Frontier 253J60
JRI Ms Pld Shaker 253E51 ET (JRI Ms 253W4)

■ Producers, no sire has ever made the impact at Judd Ranch like Top Secret (deceased) and you will find this one-of-a-kind producer in basically every Judd Ranch herdsire's pedigree. Top Secret produced some awesome sons and daughters for Judd Ranch and Top Secret was honored numerous times as a breed trait leader for calving ease, (low) birth weight and pregnancy @ 30 months. Top Secret's calving ease/ meat machine sons were always crowd favorites in the annual Judd Ranch bull sale. Today Top Secret's calving ease/meat machine grandsons, sired by Secret Instinct and Pop A Top and great grandsons, sired by General Patton, Prescribed Remedy, Bandito, and Painted Black just to name a few, are also crowd favorites. This comes as no surprise with the unbelievable beef, butt, guts and nuts they possess.

JRI Prescribed Remedy 253E38

JRI Herdsire **Homozygous Polled (75%) Balancer**
JRI Prescribed Remedy 253E38

Mytty In Focus (Countess 906)
JRI Ms Special Blend 253W28
JRI Ms Strawberry 253T8 (JRI Ms 253L71)

■ Wow, you talk about a calving ease/meatwagon Judd Ranch herdsire who's producing phenomenal progeny. Prescribed Remedy's incredible dam JRI Ms Special Blend 253W28 was honored three consecutive years as a Dam of Merit female and wowza, Special Blend has been a one-of-a-kind producer. Special Blend's first calf JRI Ms Lucy 253Y38 is one of Judd Ranch's elite donor females and Ms Lucy's first calf was JRI Ms Victoria Secret 253A48 who happens to be the incredible dam of the herdsire JRI Overachiever 253E39. Special Blend daughters and granddaughters are phenomenal producers, now pencil-in Special Blend's ability to produce calving ease/powerhouse sons as Special Blend's first son JRI Secret Password 253Z38 sold in the 2013 bull sale and the super stud reigned as the 2014 Canadian National Champion Bull.

JRI Alan 68G3

JRI Herdsire **Black, Homozygous Polled (75%) Balancer**
JRI Alan 68G3

Basin Payweight 1682 (Lass 7017)
JRI Ms My Payday 68E2
JRI McClintock 68Y8 (JRI Ms 68M7)

■ JRI Alan 68G3 was the super stud lead bull in Judd Ranch's 2020 National Champion Pen of 3 Bulls and Runner Up in the 2020 Balancer Futurity. Alan nursed a first calf heifer with an awesome teat and udder system and note Alan's phenomenal stats: 82# birthweight, 836# 205 day weight, 1,065# actual weaning weight, and 1,382# yearling weight. Alan's first-calf dam JRI Ms My Payday 68E2's unbelievable producing ability definitely comes as no surprise as Alan's grandam's 68Y8, 68G6, and 68B5 were all honored numerous times as fertility-plus/calf raising machine Dam of Merit females. Alan features "The Complete Package" of calving ease, growth, fertility, carcass, and his progeny should really excel in carcass merit as Alan posted a carcass-plus 115 intramuscular fat ratio.

JRI Marshall 214X2

JRI Reference Sire **Black, Homozygous Polled (50%) Balancer**

JRI Ms Black Secret 214U88
JRI Ms Lucky Star 214R78 ET (JRI Ms 214G6)

■ This breed leading powerhouse homozygous polled AI sire has worked fabulous at Judd Ranch in producing extreme calving ease coupled with performance plus growth. JRI Marshall 214X2 nursed a fertility-plus first calf heifer and I'd call his mama a calf raising machine as Marshall weaned off at 82% of her body weight and that's flat called Judd Ranch Cow Power. Marshall posted an awesome low birth to yearling growth spread with his calving ease deluxe 79 pound birth weight coupled with a scalebusting 1,273 pound yearling weight. Marshall's a breed trait leader for Calving Ease, (low) Birth Weight, Calving Ease Maternal, Docility, and Marbling. Marshall's calf raising machine dam was honored as a Dam of Merit female in her first year of eligibility and as an Elite Dam of Distinction honored female in her first year of eligibility.

■ This Judd Ranch meatwagon is deceased but wowsa, the Cowboy Cut sons were cowmen favorites with the unbelievable beef, butt, guts and nuts they possessed. Cowboy Cut featured one of Dave Judd's all-time favorite donor dams, JRI Ms Pd Grand Prix 213G57 and this incredible calf raising machine/fertility-plus female was honored as a Dam of Merit/Dam of Distinction. JRI Ms Pd Grand Prix 213G57 also produced incredible daughters and granddaughters. One such Dam of Merit/Dam of Distinction honored granddaughter would be JRI Ms Extravagant 213T87 the phenomenal donor dam of JRI General Patton 213B97 ET who has 105 calving ease/powerhouse sons selling in this offering.

■ This beef machine homozygous polled Judd Ranch herdsire was selected out of the fall '07 bull calf crop. Pop A Top featured an incredible low birth to growth spread with his calving ease 74# birth weight coupled with his scalebusting 787# 205 day weight. Pop A Top's 787# 205 day weight ranked #3 out of 123 contemporaries and breeders, his super dam was a first calf heifer. Pop A Top is a breed trait leader for Heifer Pregnancy, Scrotal, Yield Grade, and (lean) Fat. The first Pop A Top daughters calved in the spring of 2012 and man oh man they were fertility plus/calf raising machines. Calving ease/powerhouse sons out of Pop A Top & Pop A Top clones sell in this offering.

■ JRI Painted Black 254C741 was Judd Ranch's pick of the fall 2015 born purebred Gelbvieh bulls and oh my, check out Painted Black's awesome stats: 85# birth weight, ripping 756# 205 day weight, whopping 1,054# actual weaning weight, scalebusting 1,254# 365 day weight. Now pencil-in this calving ease/meat machine's big ol' 16.3 square inch yearling ribeye coupled with a carcass-plus 4.1 IMF (120 IMF ratio). Painted Black's incredible 10-year-old honored Dam of Merit dam JRI Ms Copy Cat 254R64 was one of Judd Ranch's all-time great donor females with a carcass-plus 109 ribeye area/110 IMF ratio on her babies. Fertility, longevity, producing ability and carcass merit run mighty deep in Painted Black's pedigree as his honored Dam of Merit/Dam of Distinction granddam 254L53 featured a 103 ribeye area/110 IMF ratio on her 13 babies.

Quotes from Judd Ranch Bull Buyers

-Judd Ranch genetics hit the mark in performance, frame score, and docility. "Holy cow, it is night and day difference," Justy says about his calves sired by Judd Ranch bulls. In one year we've improved weights by 100-lb. It's just amazing. - Justy Burleson, Ohio Commercial cow-calf producer

- With 100 to 150-pound increases in average weaning weights, Kansas cattle producer John Rose is a believer in the increased performance Judd Ranch bulls bring to a cow herd. Along with increased weaning weights, John says the calves are noticeably thicker and deeper-bodied. - John Rose, Kansas Commercial cow-calf producer

- Willis Jones is a satisfied Judd Ranch customer. Willis visited Judd Ranch a few years back on a bus tour and met the Judd family and viewed the cattle. "The Judd's treated us like family during the tour and they are the type of people I want to do business with." Willis also indicated the Judd Ranch Sight Unseen purchase worked well for him since he calves in the spring and it is hard for him to leave his farm at that time. Sold on the cattle and the people after his visit, he says he felt comfortable working with Judd Ranch consultant Roger Gatz and the SUS program to purchase a bull in the 2021 sale. Prior to the sale Willis discussed the Red Angus offering with Gatz and narrowed down his choices and placed an order. Willis' SUS proxy bidder purchased Lot 296 for \$2,500 less than his maximum bid. The SUS program sure worked well for me.-Willis Jones, Iowa Commercial cow-calf producer

-Judd Genetics Make an Impact: Improve Weaning Weights, Docility. Judd Ranch bull customer Mike Jenkins purchased his first Judd Ranch bull in 2011. Mike's cow herd includes 250 mostly Angus and Brangus females. Mike's decision to buy a Gelbvieh bull was because of the value of heterosis and how the hybrid vigor of a Gelbvieh cross would benefit his operation. The Judd Ranch Gelbvieh bulls have added approximately 85 lbs. to all his weaning weights; they have added muscle, depth of body and all the replacement females are usually the first to breed in his herd. Mike Jenkins is sold on Judd Ranch bulls. Increased weaning weights, improved docility and daughters that are easy keepers, good uddered, good legged and raise good calves keep him coming back. "I'm very pleased with the Gelbvieh influence on my cow herd."-Mike Jenkins, Commercial cow-calf producer, Texas

- Judd Bulls Increase Average Weaning Weights 250 Pounds. Susan Gladstone Tucker from Gladcrest Farms recalls fondly March 3, 2012 – the day she bought her first Judd Ranch bull after years of evaluating Judd catalogs and looking for the perfect herd bull candidate. Since the initial purchase in 2012, to 100% Judd Ranch bulls in 2018, average weaning weights has increased from 426 lbs. to 679 lbs. in 2018. Along with the steer calves Susan says the Judd Ranch-sired females are excellent. "We retain about 15 to 20 per year," she says. "When we started using Judd Ranch bulls you could easily tell which ones were sired by them."-Susan Gladstone Tucker, Missouri Commercial cow-calf producer

- "I can't say enough good things about Judd Ranch. I bought my first bull in 1990 and now my whole herd is based on Judd genetics. Last year, because of those genetics, I weaned off bull calves that weighed more than 1,000 lb. My herd is proof that you can start with a group of bad cows and after years of buying Judd Ranch bulls you can have a herd you are proud of." - Joe Peine, Commercial cow-calf producer, Kansas

Mercy, check out the stats on this calving ease/meat machine Prescribed Remedy son: calving ease 82# birth weight, whopping 825# 205-day weight, and producers, this calving ease/ meat machine weaned off his 10-year-old dam at 980 pounds. JRI Requisite 148J440's 10-year-old dam JRI Ms Bella 148Y44 was honored four consecutive years as a Dam of Merit female. Ms Bella's Dam of Merit honors come as no surprise as her first baby JRI Optimizer 148A24 posted an actual 990# weaning weight. Ms Bella's first baby JRI Optimizer 148A24 was retained as a Judd Ranch herd sire and thirteen calving ease/ powerhouse Optimizer sons sell in this offering. Cow efficiency is the talk of the industry and rest assured, the cow efficiency genetics are bred-in as Ms Bella's first baby Optimizer weaned off at 80% of Ms Bella's bodyweight.

JRI Star Link 125J41 nursed a 6-year-old fertility machine, 364-day annual calving interval mama who flat knows how to raise babies as Star Link pounded the actual weaning weight scales at 930 pounds. Star Link was actually twin born and Judd Ranch grafted Star Link's twin sister on another female and no doubt, Star Link's fertility-plus/calf raising machine mama could have raised both of these twins. Unmatched fertility and calf raising machine genetics run mighty deep in this prolific Judd Ranch 125 cow family as to date, fifty Judd Ranch born and raised 125 cow family daughters have been honored as Dam of Merit females. Longevity also runs mighty deep in this prolific 125 cow family as Star Link's Dam of Distinction honored grandam 125M316 produced scalebusting genetics for 13-plus years.

Producers, if you're new to the Judd Ranch program you'll find that the honest record keeping and integrity are unmatched. If a calf weighs 95 pounds at birth such as JRI Raven 293J41, the 95# birth weight is accurately recorded. Why Raven weighed 95 pounds at birth is beyond me as his third-calf dam's first two babies only weighed 75 and 79 pounds at birth and her Fall 2022 baby only weighed 67 pounds at birth. Rest assured, Raven offers you plenty of calving ease as Raven features top 30% calving ease EPD strength and any geneticist will tell you that calving ease EPD strength is three times more accurate in predicting a bull's calving ease than actual birth weight. Rest assured, the fertility is bred-in as Raven's grandams 293R3 and 293U3 were both honored as Dams of Merit/Dams of Distinction.

Wow, check out the stats on this calving ease/beef machine General Patton son: calving ease deluxe 76# birth weight, whopping 1,030# actual weaning weight, and the calving ease/beefpacker pounded the yearling weight scales at 1,297 pounds. JRI Powerhouse 743J4's incredibly low birth to performance-plus stats come as no surprise as Powerhouse's 7-year-old dam JRI Ms Proud Mary 743B3 has been honored as a Dam of Merit female in every year of eligibility ('19 thru '22). Ms Proud Mary's Dam of Merit honors are well deserved as to date her five calving ease deluxe/powerhouse sons have only averaged 74 pounds at birth with a scalebusting 982# actual weaning weight average.

JRI Private Stock 207J912 ET would be an ET son out of Judd Ranch's fabulous 9-year-old donor female JRI Ms Snazzy 207Z811. Point blank... Private Stock had the misfortune of being raised by a real sucky recipient dam. Producers, I can assure you that Private Stock's donor dam Ms Snazzy flat knows how to raise babies as her last natural born son JRI Troubadour 207H912 (full brother to Private Stock) sold in last Spring's sale as Lot 63 and the meatwagon posted a scalebusting 1,020# actual weaning weight off Ms Snazzy. Now let's touch on the all-important fertility and teat and udder traits as Ms Snazzy is one fertile machine with a remarkable 363-day annual calving interval with an awesome teat and udder system (99 teat and udder score).

I hear all the time from commercial cowmen that they need to reduce the mature frame size on their cow herd and they could use a little more help in the all-important fertility and teat and udder departments. Producers, JRI Epic Pass 176J4 needs to be on your search list if you're needing to reduce mature frame size and need help in the all-important fertility and teat and udder departments. Epic Pass comes in a moderately framed package which should really help in moderating your cow herd. And man, oh man, Epic Pass' daughters should be fertile machines with unsurpassed teat and udder structures as Epic Pass' 6-year-old Dam of Merit honored dam JRI Ms Sweet Adeline 176C3 features a truly beautiful teat and udder structure.

Producers, if you're new to the Judd Ranch program you'll find their record keeping, honesty, and integrity unmatched. Why Out Of The Blue weighed 104 pounds at birth is really puzzling as his fourth-calf dam JRI Ms Impressive 140D47 ET has never produced a larger type birth weight as her first 3 babies only weighed 71, 80, and 81 pounds at birth. I can tell you that Ms Impressive is one fertile Dam of Merit honored female who flat knows how to raise babies as she sports a performance-plus 110 weaning weight and 111 yearling weight ratios on her four babies. Producers, Out Of The Blue should produce scalebusting genetics at weaning time and note his humongous 18 square inch yearling ribeye and carcass-plus 4.5 IMF that Out Of The Blue scanned. (RC)

Just about everyone likes a big ol' juicy ribeye steak and the progeny out of JRI Captain 246J4 should keep your freezer well supplied with the humongous 17.1 square inch yearling ribeye that Captain scanned. Captain nursed a fertility-plus/calf raising machine 5-year-old Top Producer daughter JRI Shesa Deva 246D3. Captain's pedigree is loaded with fertility-plus/calf raising machine genetics as he features 6 Dam of Merit honored grandams 246X20, 246R10, 246M9, 246H8, 246C6 & 246A5. Captain should flat boost your performance levels and if you retain your feeders, you should be looking at substantial increased profits on the rail with the humongous 17.1 square inch yearling ribeye that Captain scanned.

Please turn to page 18 as I'd really like to show you a photo of this ET bull's phenomenal 6-year-old donor dam JRI Ms Perfect Replica 140C76 ET. Hopefully you turned to page 18 as Ms Perfect Replica is one phenomenal female with an awesome teat and udder system and she's mighty fertile as she's been honored as a Dam of Merit female in every year of eligibility. To date, Ms Perfect Replica's four natural born sons have posted the following incredible averages: 82# birth weight, whopping 807# 205-day weight, and the four powerhouses averaged a scalebusting 934# actual weaning weight off Ms Perfect Replica. JRI Star Studded 140J861 ET would be an ET full sib to Ms Perfect Replica's four powerhouse natural born sons.

All Business nursed JRI Ms Sweetie 230D8 a fertile machine 365-day annual calving interval 5-year-old Secret Sensation daughter. Ms Sweetie's fertility-plus 365-day annual calving interval comes as no surprise as Ms Sweetie's dam JRI Ms Sugar Pie 230T7 was honored numerous times as a Dam of Merit/Dam of Distinction female. Longevity is way overlooked just like the fertility factor that's been documented as 12 times more economically important than growth, carcass, and etc. Rest assured, longevity is bred-in All Business' pedigree as his honored Dam of Distinction grandam Ms Sugar Pie produced scalebusting progeny for 14 years. Producers, if your cow herd is in need of improving teat and udder quality, tie into these General Patton sons as the General Patton daughters in production feature unmatched teat and udder systems. Teat and udder excellence are always on the radar at Judd Ranch and you can note the teat and udder excellence on every female on display in this sale catalog and every photographed female is Judd Ranch born and raised. JRI Pursuit 230J11 should make a tremendous impact in improving your teat and udder structures as he's sired by General Patton and Pursuit's 7-year-old fertility-plus dam JRI Ms Paisley 230B91 who possesses a flawless 99 teat/udder score. Rest assured, the calving ease is bred-in Pursuit as he features top 35% calving ease EPD strength.

If you're searching for a "heifer bull" JRI Patton 253J588 should be a heifer bull deluxe calver. Patton's 69# birth weight indicates calving ease deluxe genetics and note Patton's top 4% calving ease EPD strength. Patton nursed a first-calf Secret Instinct daughter JRI Ms Sundance 253G488 and Ms Sundance excels in producing calving ease genetics as her fall 2022 baby only weighed 48 pounds. Rest assured, the fertility is bred-in Patton as he features 4 Dam of Merit grandams. One of Patton's Dam of Merit grandams would be 253W28 the incredible dam of JRI Prescribed Remedy 253E38, Judd Ranch's calving ease/powerhouse herd sire who has 42 calving ease/powerhouse sons selling March 4th.

Oh man, you talk about a "heifer bull" flat loaded with fertility-plus/calf raising machine genetics. JRI Ivy League 246J400 should be a big-time "heifer bull" as he features top 4% calving ease EPD strength and any geneticist will tell you calving ease EPD strength is 3 times more accurate in predicting a bull's calving ease. Rest assured, calving ease genetics are bred-in Ivy League as his second-calf dam's first baby only weighed 65 pounds at birth. I mentioned above Ivy League's pedigree is flat loaded with fertility-plus/calf raising machine genetics and, oh man is it, as Ivy League features 6 Dam of Merit honored grandams.

I made a note to view JRI Patented 224J9 coming off gain test as Patented was on the potential cut list with the substandard performance levels he posted. Can't tell you why Patented's performance levels are off but I can tell you he's a beef machine and Patented nursed an 8-year-old dam JRI Ms Star Power 224A8 with a 365-day annual calving interval and Ms Star Power flat knows how to raise babies. Ms Star Power's first three sons were all calving ease/beefpacking machines as the trio featured a 79# birth weight average with a scalebusting 927# actual weaning weight average off Ms Star Power. Rest assured, the performance genetic impact should be bred-in Patented.

Producers, if you're needing to boost your all-important fertility and cow efficiency levels check out the resume on this beefpacking machine General Patton son. JRI High Roller 68J45 nursed Ms Carry On 68F35 a fertility-plus 366-day annual calving interval Capitol Hill daughter. Ms Carry On is well equipped in the cow efficiency department as High Roller's whopping 890# actual weaning weight figures to be 72.1% of Ms Carry On's 1,235# body weight. Ms Carry On's awesome producing ability, fertility and cow efficiency comes as no surprise as her grandams '68T84 & '68E64 were honored as Dams of Merit/Dams of Distinction.

Teat and udder excellence is always on the radar at Judd Ranch. Producers, throughout this catalog you'll note the teat and udder excellence on every female photographed and every female was born and raised at Judd Ranch. JRI Rembrandt 176J411 nursed a third-calf General Patton daughter JRI Ms Paris Hilton 176E41 and oh man, Ms Paris Hilton possesses a flawless 99 teat/udder score. Fertility and calf raising machine genetics run mighty deep in Rembrandt's pedigree as he features four Dam of Merit honored grandams. Rembrandt should spread your (low) birth to performance-plus growth levels while injecting the all-important fertility genetics into your program.

Wow, you talk about a beef machine fully equipped with performance, carcass merit, fertility, and cow efficiency. JRI Phringe Benefits 285J3K flat crushed the actual weaning weight scales at 1,035 pounds and note Phringe Benefits' humongous 17.2 square inch yearling ribeye. Now pencil-in the all-important fertility-plus factor as Phringe Benefits 6-year-old dam JRI Ms Mytty In Focus 285C2K possesses a 366-day annual calving interval. Phringe Benefits fertility-plus/calf raising machine dam features unbelievable cow efficiency as Phringe Benefits whopping 1,035# actual weaning weight figures to be 70.2% of Ms Mytty In Focus' bodyweight.

Oh man, if you like big ol' juicy ribeye steaks check out the humongous 17.6 square inch yearling ribeye on this meat machine General Patton son. JRI Blk Porsche 254J32 nursed a 5-year-old Optimizer daughter JRI Ms Old Faith 254D225 who's been honored as a Dam of Merit female in every year of eligibility. Ms Old Faith's Dam of Merit honors come as no surprise as Blk Porsche's full brother JRI Pendleton 254H325 sold in last spring's sale as Lot 139 with a whopping 980# actual weaning weight and Blk Porsche posted the same exact 980# actual weaning weight. Unmatched fertility and bringing home the beef are a common occurrence for Ms Old Faith as her fall 2019 son JRI Picasso 254G324 (full brother to Blk Porsche & Pendleton) hammered the actual weaning weight scales at 1,035 pounds.

JRI On Call 47J27 nursed a calf raising machine second-calf General Patton daughter JRI Ms Patton 47F27 and wowsa, Ms Patton flat knows how to raise babies. Ms Patton's first baby JRI Sir Loin 47H37 sold in last spring's sale as Lot 158 and the meatwagon featured an 86# birth weight, whopping 1,080# actual weaning weight, scalebusting 1,359# yearling weight. Why On Call weighed 98 pounds at birth is real puzzling as Ms Patton's fall '22 baby only weighed 59 pounds at birth. Genetically, On Call shouldn't produce excess birth weights but oh man, he should produce scalebusters at weaning time. Please note On Call's scan data are estimates only as he was too young for the Gelbvieh system to calculate.

JRI Pinnacle 017J57 ET would be an ET son out of JRI Ms Jewels 017X10, Judd Ranch's incredible 11-year-old Dam of Distinction donor female. Ms Jewels is one fertile machine as she's been honored as a Dam of Merit/Dam of Distinction female in every year of eligibility ('15 thru '22). Ms Jewels Dam of Merit/Dam of Distinction honors are truly amazing as Ms Jewels has produced 27 natural and ET calves and Ms Jewels flat knows how to raise babies as her 6 natural born sons have averaged a scalebusting 981 pounds at weaning time. Ms Jewels' unmatched fertility and producing ability comes as no surprise as her 16-year-old dam 017S9 is still producing babies with a remarkable 365-day annual calving interval.

Check out the resume on this "heifer bull" deluxe Optimizer son. JRI Prince Charming 254J328's fifty-pound birth weight indicates calving ease deluxe genetics and note Prince Charming features top 1% calving ease EPD strength. Rest assured, the calving ease is bred-in as Prince Charming's mama's second baby born last fall only weighed 61 pounds at birth. Prince Charming's first-calf dam JRI Ms Opposites Attract 254G226 flat knows how to raise babies and producers, Ms Opposites Attract is well blessed in the teat and udder department with a 99 teat/udder score. Be assured, the fertility is bred-in as Prince Charming's grandams' 254N72, 254E52 & 254C4 were all Judd Ranch honored Dam of Merit females.

JRI Porterhouse 68J34 ET would be an ET son out of JRI Ms My Payday 68E2, Judd Ranch's phenomenal 5-year-old donor female. Ms My Payday's first baby JRI Alan 68G3 was retained as a Judd Ranch herd sire and Alan has 18 powerhouse sons selling in this offering. Alan's sons being powerhouses comes as no surprise as Alan features an 82# birth weight, whopping 1,065# actual weaning weight, scalebusting 1,382# 365-day weight with a carcass premium 5.0 IMF. JRI Porterhouse 68J34 ET would be an ET full brother to Alan and Porterhouse should produce scalebusting progeny at weaning time as Porterhouse pounded the actual weaning weight scales at 1,020 pounds.

JRI Manhattan 9J36 nursed a first-calf General Patton daughter JRI Ms Playboy Bunny 9G46 who features a beautiful teat and udder system which comes as no surprise as the General Patton daughters are all equipped with beautiful teat and udder systems. Manhattan stems from the fertility-plus/calf raising machine Judd Ranch 9 cow family who already features 25 Dam of Merit honored daughters and each one was born and raised at Judd Ranch. Two of those fertility-plus/calf raising machine 9 cow family daughters would be Manhattan's Dam of Merit/Dam of Distinction honored grandams' 9X35 & 9B7 who produced scalebusting progeny for ten plus years.

Wow, you talk about a beef machine General Patton son equipped with all the profitability traits. JRI Bona Fide Deal 270J30 flat hammered the actual weaning weight scales at 1,020 pounds. Bona Fide Deal nursed a 7-year-old Cole Creek Cedar Ridge daughter Ms 270B20 who's mighty fertile with a 367-day annual calving interval. Ms 270B20 awesome fertility-plus/ calf raising machine ability comes as no surprise as her grandams' 270T60 & 270F50 were both honored Dams of Merit and as breed elite Dams of Distinction. Another trait way overlooked in the beef industry is teat and udder quality and Bona Fide Deal's dam sports a 98 teat/udder score.

Producers, just think of your increased profitability if you could maintain fertility-plus 12-year-old females with the ability to wean off scalebusting 985# actual weaning weight calves. JRI Lieutenant Dan 254J321's scalebusting 985# actual weaning weight off his Dam of Distinction honored 12-year-old dam JRI Lil Missy 254W22 comes as no surprise as Lil Missy's first four sons averaged a scalebusting 938 pounds at weaning. Lil Missy's awesome fertility and producing ability comes as no surprise as her Dam of Merit honored grandam 254N72 weaned off her bull calf at 1,075 pounds and producers, 254N72 was 15 years old when she weaned off her scalebusting 1,075# bull calf and the 1,075# figure is not a typo.

If you're searching for a "heifer bull" loaded with fertility strength JRI Preston 285J380 is your man. Preston's 62# birth weight indicates big-time calving ease genetics and note Preston's top 10% calving ease EPD strength. To assure you the calving ease is bred-in, I like to research the dam's track record on birth weights and Preston's full brother JRI Ezy Pezy 285H38 sold in last spring's sale as Lot 108 with a calving ease deluxe 59# birth weight. Now pencil-in the all-important fertility factor as Preston's third-calf dam JRI Ms One-Derful 285E28 features a 361-day annual calving interval and next year it'll be even tighter as she shortened her gestation another 7 days with her fall 2022 baby.

JRI Bells N Whistles 270J80's twin brother JRI Pleasures Mine 270J81 sells as Lot 172 and wowsa, these twin brothers feature one fertile/calf raising machine 12-year-old dam. These twins' 12-year-old dam JRI Ms Cowgirl Diva 270W70 features an amazing 365-day annual calving interval. Ms Cowgirl Diva's 365-day annual calving interval comes as no surprise as her dam 270T60 and grandam 270F50 were both honored as Dams of Merit and as breed elite Dams of Distinction. Judd Ranch grafted Ms Cowgirl Diva's twin son Pleasures Mine onto another female, but she wouldn't have had a problem raising both of her twins as Bells N Whistles hammered the actual weaning weight scales at 925 pounds.

Wow, check out the awesome birth to growth spread on this meat machine Secret Instinct 2 son and producers, JRI Shenandoah 253K484 nursed a first-calf heifer. Shenandoah comes complete with a calving ease deluxe 69# birth weight and the meat machine crushed the 365-day weight scales at 1,360 pounds. Shenandoah is also well-equipped in the scrotal department and producers if you retain your feeders, note Shenandoah's mighty impressive 5.44# ADG coupled with a big ol' 15.7 square inch yearling ribeye. Shenandoah's first-calf dam JRI Ms Perfect Match 253H384 ET possesses an unmatched 99 test and udder score and rest assured, the fertility is bred-in as Shenandoah features 3 Dam of Merit honored grandams. Producers, you might note that Shenandoah's first-calf dam is a full sister to Judd Ranch's calving ease/powerhouse herd sire JRI Prescribed Remedy who has 42 sons selling in this offering. (HP)

JRI Phringe Benefits 253K4 was a member of Judd Ranch's 2023 National Champion Pen of 5 Purebred Gelbvieh Bulls and the Pen Bull Show judge really took a liking to this beef machine General Patton son. Phringe Benefits' nursed a 6-year-old fertility-plus 361-day annual calving interval Secret Instinct daughter JRI Ms Secret Empress 253D3 who has been honored as a Dam of Merit female in every year of eligibility. Ms Secret Empress flat knows how to produce beef machine sons as her 2020 son JRI Good Vintage 253H40 (full brother to Phringe Benefits) was a member of Judd Ranch's 2021 National Champion Pen of 5 Purebred Gelbvieh Bulls. Rest assured, the calving ease is bred-in as Phringe Benefits features top 35% calving ease EPD strength and calving ease EPD strength is three times more accurate in predicting a bull's calving ease than actual birth weight.

JRI Commander N Chief 253K581 was a member of Judd Ranch's 2023 Reserve National Champion Pen of 5 Purebred Gelbvieh Bulls. Turn to page 50 and the meatpacker JRI Pendleton 253H585 ET photographed above Lot 196 is an ET full brother to Commander N Chief and Pendleton was a member of Judd Ranch's 2021 National Champion Pen of 3 Purebred Gelbvieh Bulls. Commander N Chief and Pendleton's 7-year-old dam JRI Ms Sweet Pea 253C481 ET is one fertile machine with a 365-day annual calving interval. Ms Sweet Pea's phenomenal fertility comes as no surprise as she features 3 Dam of Merit honored grandams' 253W28, 253L71 & 253F61. You might note Ms Sweet Pea's grandam 253W28 is the incredible dam of Judd Ranch's calving ease/powerhouse herd sire Prescribed Remedy who has 42 powerhouse sons selling on March 4th.

Oh man, check out this beef machine General Patton son JRI Captain 246K69 and you talk about a beef machine fully equipped with beef, butt, guts & nuts. Captain offers you extreme calving ease with his 70# birth weight and the beef machine pegged the 365-day weight scales at 1,199 pounds. Captain excels in the scrotal department with a big ol' 38.6 centimeter yearling scrotal and his progeny should produce substantial carcass dividends with the 15.3 square inch yearling ribeye and carcass-plus 4.1 IMF Captain scanned. Captain nursed a first-calf Secret Instinct 2 daughter JRI Ms Sunkissed 246H59 and Ms Sunkissed is well blessed in the teat and udder department. Ms Sunkissed's awesome producing ability comes as no surprise as she features 4 Dam of Merit honored grandams.

JRI Real Deal 47K21 stems from the calf raising machine Judd Ranch purebred Red Angus 47 cow family and oh man, Real Deal posted some mighty impressive stats. Those stats include a calving ease 79# birth weight, whopping 1,258# 365-day weight and Real Deal's progeny should produce big-time carcass premiums as Real Deal scanned a carcass-plus 5.7 IMF. Real Deal's third-calf purebred Red Angus mama JRI Ms Judd Legend 47F21 flat knows how to raise babies and she's well equipped in the teat and udder departments. Teat and udder excellence runs mighty deep in Real Deal's pedigree as you can check out a photo of Real Deal's grandam on page 79, above Lot 314, and note this beauty's phenomenal teat/udder structure. Calving ease/beef machine genetics which should produce big time carcass dividends.

JRI After Hours 254K25 was a member of Judd Ranch's 2023 National Champion Pen of 5 Balancer Bulls and this meatwagon has all the profitable traits well covered. After Hour's posted a whopping 985# actual weaning weight and the meatwagon hammered the 365-day weight scales at 1,433 pounds. In the men's department, After Hours is well blessed with a 42.4 centimeter yearling scrotal circumference and note his feeder delite 4.71# ADG. If you retain your feeders or sell them, you should have plenty of buyers lined up as progeny out of After Hours should produce substantial carcass premiums with the big ol' 17.7 square inch yearling ribeye and carcass-plus 4.5 IMF the meatwagon scanned. Now pencil-in After Hours 7-year-old 366-day annual calving interval dam who's mighty efficient as After Hours weaned off at 70.6% of her body weight.

Please research this sale catalog from front to back as I can tell you, big-time profitability bulls are throughout. Case in point, JRI Performer 253K385 ET was a member of Judd Ranch's 2023 National Champion Pen of 5 Balancer Bulls. If you study pedigrees, you'll note Performer as a black ET full brother to Judd Ranch's calving ease/powerhouse herd sire JRI Prescribed Remedy 253E38 who has 42 calving ease/powerhouse sons selling in this offering. Performer should flat spread your birth to growth ratios and note this meatwagon's 4.85# ADG coupled with a carcass-plus 15.8" yearling ribeye and 4.5 IMF scan data. Rest assured, the calving ease is bred-in as Performer features top 15% calving ease EPD strength and calving ease EPD strength is three times more accurate in predicting a bull's calving ease than actual birth weight. JRI Fist Full Of \$\$ 307K231 was a crowd favorite at the National Balancer Pen Bull Show in Oklahoma City and the judge agreed as Fist Full Of \$\$'s was a member of Judd Ranch's 2023 National Champion Pen of 5 Balancer Bulls. This meatwagon Basin Payweight son posted a whopping 935# actual weaning weight off his 8-year-old dam and the meatwagon flat crushed the 365-day weight scales at 1,347 pounds. Scalebusting performance is the norm for Fist Full Of \$\$'s 8-year-old dam JRI Ms Poppies N Petunias 307B31 as her first son JRI Special T 307F41 sold in the 2019 sale as Lot 178 and Special T featured an 85# birth weight with a scalebusting 1,309# 365-day weight. Fist Full Of \$\$'s should flat produce scalebusting progeny at weaning time and note his mighty impressive 16.9" yearling ribeye coupled with a marbling-plus 4.3 IMF. (RC)

Producers, if you're searching for calving ease genetics loaded with mighty impressive carcass-plus scan data, add JRI Top Brass 285K393 to your search list. Top Brass' second-calf dam JRI Ms Payweight 285G293 has really been a birth weight moderator as her first baby only weighed 62 pounds at birth. At the same time Ms Payweight flat knows how to raise beef machine sons and Ms Payweight is equipped with a beautiful teat and udder system. Producing ability, fertility and teat and udder excellence runs mighty deep in the prolific Judd Ranch 285 cow family as to date, fifty-two 285 cow family daughters have been honored as Dam of Merit females. Turn to page 59 and the beauty shown above Lot 232 would be Top Brass' grandam photographed at 9 years of age and note her amazing teat/udder structure.

Oh man, you talk about a meatwagon who has all the profitable traits of calving ease, performance, carcass merit and fertility well covered. JRI Bonus Plan 254K370 debuted with a calving ease 81# birth weight, hammered the 365-day weight scales at 1,292 pounds and progeny out of Bonus Plan should really excel on the rail with the big ol' 16 square inch yearling ribeye and 4.4 IMF scan data Bonus Plan scanned. Now pencil-in the all-important fertility factor as Bonus Plan's 12-year-old dam JRI Ms Coppertop 254X37 was honored five consecutive years as a Dam of Merit and three times as an elite Dam of Distinction female. Ms Coppertop is one fertile/calf raising machine as her last son JRI Converter 254H47 sold in the '21 sale as Lot 290 and producers. Converter posted a whopping 1,045# actual weaning weight and the meatwagon crushed the yearling weight scales at 1,430 pounds.

JRI Pete 25K23 was twin born to a DOA heifer calf, so Pete is possibly not a "heifer bull" as his 54# birth weight would indicate. I can tell you "heifer bull" genetics run mighty deep as his third-calf purebred Red Angus dam JRI Ms Judd Redemption 25F13 has really been a birth weight moderator as her first two babies only weighed 56 and 62 pounds at birth. Ms Judd Redemption really excels in producing extremely low birth weight genetics but at the same time she flat knows how to raise beef machine sons. Our talented auctioneer Charly Cummings purchased Ms Judd Redemption's first baby JRI Judd Defender 25H14 in the '21 sale as Lot 302 and Judd Defender was well equipped in the beef, butt, guts & nuts department.

If you're searching for a "heifer bull" with unmatched fertility and longevity genetics bred-in, add JRI Majesty 254K321 to your search list. Majesty should be a sleep all night "heifer bull" as he debuted at 60 pounds and note Majesty's top 1% calving ease EPD strength. Now pencil-in the unmatched fertility and longevity genetics as Majesty features 3 Dam of Merit/Dam of Distinction honored grandams' 254P62, 254E52 & 254C4. Majesty's three phenomenal grandams' 254P62, 254E52 & 254C4 were three of the all-time great donor females at Judd Ranch with the trio producing 93 natural & ET born calves. As noted above, longevity also runs mighty deep in Majesty's genetic makeup as grandam 254P62 produced scalebusting genetics for 14 years, 254E52 for 18 years and 254C4 for 15 years.

Fertility is way overlooked in the beef industry and fertility has been documented as 12 times more economically important than growth, carcass & etc. JRI Judd Enterprise 25K3 offers you a tremendous opportunity to really boost your all-important fertility and longevity levels as Enterprise 25K3 nursed a fertility-plus/calf raising machine 12-year-old mama. Enterprise 25K3's 12-year-old dam JRI Judd Logan 25X2 flat knows how to produce beef machine sons. Her first son JRI Judd Linebacker 25A12 sold in the '14 sale as Lot 270 and the beefpacker posted an actual 936# actual weaning weight...72% of 25X2's body weight. Her next son JRI Judd Conquest 25D31 sold in the '17 sale as Lot 294 and the beefpacker pounded the 365-day weight scales at 1,243 pounds. Judd Enterprise 25K3 should flat spread your birth to growth ratios and his daughters should be fertility/longevity-plus calf raising machines.

Judd Ranch Mamas Flat Know How to Raise the Scalebusters

Judd Ranch Mamas Flat Know How to Raise the Scalebusters

Judd Ranch Customers Profit from Selling on the Grid

Judd Ranch bull customers who have been following their Gelbvieh-influenced and Balancer-influenced fat cattle on the rail and selling on the grid have found that their Judd Ranch-influenced Gelbvieh- and Balancer-influenced cattle outperform the U.S. industry average of 7 to 8 percent Prime and 70 percent Choice.

Travis Olson, Triple O Ranch, South Dakota has been purchasing Judd bulls for six years when wanting it all - performance (pounds) and carcass quality - Travis started his search for a new bull supplier for his family's 300 head Angus-based females. This led him to making the 600-mile drive to Pomona to check out the Judd Ranch program. Impressed with what he saw, the Olson's have been a customer ever since. Travis says the Judd bulls increased averaged finished weights 50 to 75 lb. per head. That's more than 15,000 total pounds - money in the bank. As farmer-feeders, the family's goal is to finish calves at 13 months of age. The family is excited about the carcass results of their 2020 calf crop that averaged 86% Choice or higher. Sold on the Judd Ranch program, Travis summarizes, "If you are feeding and finishing straight Angus cattle, I highly recommend you try a Judd Ranch Gelbvieh bull and see how much you will gain."

2021 Triple O Ranch Carcass Data - All sired by Judd Ranch bulls

Avg. Harvest Weight		Avg. ADG	Avg. Yield	Avg. Quality Grade
155 Heifers	1,300 lb.	3.33 lb./day	63%	87% Choice or better
145 Steers	1,425 lb.	3.65 lb./day	63.25%	86% Choice or better

Gerald Merz from Missouri has had a similar "happy camper" experience selling his Gelbvieh- and Balancer-influenced fats on the grid. Every steer in Gerald's first load of 36 head of fats in 2018 graded Choice or better, with 14 of the 36 grading Prime and 11 qualifying for the CAB program. Sired by Judd Ranch purebred Gelbvieh bulls and out of Angus cows, these steers were what Gerald calls "the industry's highly desired Continental X British crosses." In another group of Judd Ranch Gelbvieh- and Balancer-influenced fats, 11 out of 18 went Prime and four or five went CAB. All were Choice or higher. The Missouri cattleman's formula for success: Judd Ranch purebred Gelbvieh and Balancer bulls on Angus and Angus X Judd Ranch-influenced females. "I've been using performance bulls for more years than I can count and have been retaining ownership and selling on the rail for 15 to 20 years. I figure I can either get paid for my better genetics or someone else will," Gerald explains. "With the dryness, I've been weaning the middle of August. The calves go on silage and a little corn. They stay on that ration, and I increase their corn as they get bigger. They're 17 to 18 months old when they are harvested. "As the kill sheets show, Judd Ranch Gelbvieh-sired and Balancer-sired cattle are definitely performing mighty fine on the rail for me."

Bill and Kathy Stoltz, BK Ranch, Wisconsin, are among the cow-calf producers who expect more from their Gelbvieh-influenced cattle and simply wouldn't be happy if only 7 to 8 percent of their fat cattle went Prime. "We're getting right at 50 percent Prime, and it's been a long time since we had any cattle grade less than Choice," Bill explains. The cattle that have been performing so well on the rail for Bill and Kathy are "more Gelbvieh than anything else." The Stoltz's cow herd has a "bit of Angus" in them and a whole lot of Judd Ranch Gelbvieh. Bill adds that, the last five to six years, they have been using purebred Gelbvieh bulls. "If people think Gelbvieh and Balancers won't grade, then they might want to pick different bulls," Bill interjects. "A lot of how cattle grade hinges on picking the right bulls. I am really fussy about buying bulls with good carcass values, and that has been paying off."

Tracy Lake, a cow-calf producer from Idaho, has been using Judd Ranch bulls for close to 20 years. He's also been feeding out cattle and selling them on the grid for the same amount of time. His 1,500 head of mother cows are black crossbreds, primarily Gelbvieh X Simmental or Gelbvieh X Angus. Using Charolais bulls on his Judd Ranch-influenced Gelbvieh cross females, his calves are averaging 61 to 64 percent on yield. Tracy estimates that, on average, his steers hit about 10 percent Prime and 70 percent Choice — or better. "Genetics are important, and feed is equally important," he tells. "We like to turn over the cattle. As soon as we think they will grade, they sell on the grid." Tracy attributes being successful on the grid to two factors: genetics and feed. And he's adamant that it takes a darn good cow to produce a good calf that performs start to finish. "We love our Gelbvieh-influenced cows," he continues. "I can't say enough good about our Gelbvieh crossbred cows. Their calves perform well on the rail."

Mark Wray started feeding cattle when he got out of college. At first, he purchased what he thought were "really good calves" from the auction barn. But, despite the calves being Angus, he said they were missing the boat when they hung on the rail. "Then I heard a guy giving a presentation say that the best animal you can feed is a Continental X British cross, and that got me to thinking," Mark elaborates. "I knew Judd Ranch just down the road had the best Continental cattle out there and I could raise my own cattle and benefit from selling them on the grid. Plus, I could improve my cow herd at the same time. "So, I started buying Judd Ranch bulls — purebred Gelbvieh — and putting them on our 300 Angus mama cows. I knew that with Judd Ranch bulls I would get bulls that excel in maternal traits and growth traits and my calves would be that highly desired Continental X British cross." This commercial cowman from Kansas says his first set of home-raised Judd Ranch-influenced Continental X British cross calves hung on the rail "really well." "But the big benefit to using Judd Ranch bulls was once my Judd Ranch-influenced heifers were in production," he explains. "For the past three years, I've been putting Judd Ranch Balancer bulls on my crossbred (Angus X Gelbvieh) females and 'Wow!'. Our yield on those calves went up a full percent. "That's a \$20 to \$30 a head premium." Mark adds that, year in and year out, 10 to 11 percent of his calves are grading Prime and another 80 percent are grading Choice. That's 90 to 91 percent consistently grading Choice or better. He points out that Judd Ranch genetics are giving him the yield he needs to sell on the grid, without sacrificing quality grade. "We've been using Judd genetics to make better mama cows, and we're picking up some yield at the same time," Mark states. "The myth out there that Gelbvieh or Balancers won't sire calves that will work on the grid is not accurate. It's just that — a myth. It's a false belief. "Our calves and the premium we've been getting are proof that Gelbvieh-cross and Balancer-cross calves work on the grid. Heck, I sure enjoy that extra \$20 to \$30 per head."

Producers when you have Gelbvieh cross females (heifer calves, bred heifers or cows) for sale, give Ashley Judd a call at 785-248-6005. We receive calls throughout the year looking for replacement Gelbvieh cross females and we'd love to help you place them at NO COST on Judd Ranch's Website! www.juddranch.com

Sale Notes

Increase Calf Crop Profit Using Homozygous Polled Bulls

Judd Ranch is always striving to add more value to your next calf crop. Homozygous polled bulls can reduce management issues and increase the value of your calves in the marketplace.

Tom Troxel, Arkansas extension beef specialist, says research shows that horned calves marketed at weaning age were discounted \$8/ cwt. On a 500-weight calf, that's \$40 removed from your pocket when you sell a horned calf. Turn the scenario around. That means if you sold polled calves, no discount would have occurred and you would benefit with getting that \$40 per head in your pocket. On a group of 50 calves, that's an additional \$2,000.

Data collected from nine Texas livestock auctions on 1,420 lots with 7,073 head shows that polled calves sold, on average, for \$22.87/cwt. more than their horned counterparts. That's \$114.35/head. On a group of 50 calves averaging 500 pounds/year, we're talking an additional \$5,717.50 just for selling polled or dehorned calves.

302 of the 315 Judd Ranch bulls selling on March 4 are Homozygous Polled.
